Front Matter: Volume 6801

Event: SPIE Microelectronics, MEMS, and Nanotechnology, 2007, Canberra, ACT, Australia
The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/08/$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B, ..., 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

vii Conference Committee
ix Introduction
xiii Symposium Sponsors

PLASMONIC NANOPHOTONICS

6801 02 Near-field imaging through plasmonic superlenses (Invited Paper) [6801-01]
R. J. Blaikie, C. P. Moore, MacDiarmid Institute for Advanced Materials and Nanotechnology, Univ. of Canterbury (New Zealand); M. D. Arnold, MacDiarmid Institute for Advanced Materials and Nanotechnology, Univ. of Canterbury (New Zealand) and Univ. of Technology Sydney (Australia); D. O. S. Melville, MacDiarmid Institute for Advanced Materials and Nanotechnology, Univ. of Canterbury (New Zealand) and IBM Thomas J. Watson Research Ctr. (USA)

PHOTONIC DEVICES I

6801 04 Recent advances in high-power silica-fibre lasers operating at 2 µm (Invited Paper) [6801-03]
S. D. Jackson, Univ. of Sydney (Australia)

6801 06 Reversible photomodification of LiNbO3 and LiTaO3 by femtosecond laser pulses [6801-05]
V. Mizeikis, S. Juodkazis, Hokkaido Univ. (Japan); M. Sudzius, Vilnius Univ. (Lithuania); H. Misawa, Hokkaido Univ. (Japan); E. G. Gamaly, A. V. Rode, W. Z. Krolikowski, The Australian National Univ. (Australia); K. Kitamura, National Institute for Materials Science (Japan)

6801 07 Patterning of inorganic polymer glass waveguiding films by dry etching [6801-06]
S. J. Madden, M. Zhang, B. Luther-Davies, R. Charters, Australian National Univ. (Australia)

NONLINEAR EFFECTS AND DEVICES

6801 09 Accurate nonlocal theory for cascaded quadratic soliton compression (Invited Paper) [6801-08]
M. Bache, O. Bang, Technical Univ. of Denmark (Denmark); J. Moses, Massachusetts Institute of Technology (USA); F. W. Wise, Cornell Univ. (USA); W. Krolikowski, Australian National Univ. (Australia)

6801 08 Tunable narrow-band spectral peak imposed onto a soliton with an acoustic long-period grating [6801-10]
J. A. Bolger, F. Luan, D.-I. Yeom, E. Tsoy, C. M. de Sterke, B. J. Eggleton, Univ. of Sydney (Australia)
MATERIALS AND STRUCTURES

6801 0H Opto-electronic control of terahertz metamaterials (Invited Paper) [6801-16]
National Lab. (USA); R. D. Averitt, Boston Univ. (USA)

6801 0I Plasmonic nanoresonant materials [6801-17]
S. M. Orbons, M. Milicevic, C. M. Rollinson, B. Gibson, S. T. Huntington, D. N. Jamieson,
The Univ. of Melbourne (Australia); B. Luther-Davies, D. Freeman, Australian National Univ.
(Australia); M. I. Haftel, Naval Research Lab. (USA); C. Schlochermann, RWTH Aachen
(Germany); T. J. Davis, CSIRO Materials Science and Engineering (Australia); A. Roberts,
The Univ. of Melbourne (Australia)

6801 0J Diamond waveguides: toward an all-diamond platform [6801-18]
M. P. Hiscocks, C. J. Kaalund, F. Ladouceur, Univ. of New South Wales (Australia);
S. T. Huntington, B. C. Gibson, S. Trpkovski, D. Simpson, E. Ampem-Lassen, S. Prawer, Univ. of
Melbourne (Australia)

PHOTONIC DEVICES II

6801 0N A transmit reflect detection system for fiber Bragg grating photonic sensors [6801-23]
G. Wild, S. Hinckley, P. Jansz, Edith Cowan Univ. (Australia)

6801 0O Compact, all-fibre, linearly polarized, single-mode Ytterbium-doped fibre laser utilizing
point-by-point inscribed intra-core fibre Bragg gratings [6801-24]
N. Jovanovic, G. D. Marshall, A. Fuerbach, G. Town, M. J. Withford, Macquarie Univ.
(Australia); S. Bennett, D. G. Lancaster, Defence Science and Technology Organisation
(Australia)

BANDGAP STRUCTURES

6801 0R The three-dimensional colloidal crystal growth on the end face of optical fiber: method
and characterization [6801-27]
H. Yan, M. Wang, Y. Ge, P. Yu, Nanjing Normal Univ. (China)

6801 0U Fine tuning of single row photonic crystal extended cavities embedded in photonic wire
waveguides [6801-30]
A. R. Md Zain, Univ. of Glasgow (United Kingdom); H. M. H. Chong, Univ. of Glasgow (United
Kingdom) and Univ. of Southampton (United Kingdom); N. Johnson, R. M. De La Rue, Univ.
of Glasgow (United Kingdom)

PHOTONIC DEVICES III

6801 0W Tunable photonic structures based on silicon and liquid crystals (Invited Paper) [6801-32]
T. S. Perova, Univ. of Dublin (Ireland); V. A. Tolmachev, Univ. of Dublin (Ireland) and Ioffe
Physicotechnical Institute (Russia); E. V. Astrova, Ioffe Physicotechnical Institute (Russia)
Laser frequency stabilization with toroidal optical microresonators [6801-35]
M. McGovern, T. G. McRae, Univ. of Otago (New Zealand); G. Turner, Univ. of Canterbury (New Zealand); A. J. Kay, Industrial Research Ltd. (New Zealand); R. J. Blaikie, Univ. of Canterbury (New Zealand); W. P. Bowen, Univ. of Otago (New Zealand)

On shotnoise and Brownian motion limits to the accuracy of particle positioning with optical tweezers [6801-36]
J. W. Tay, X. Jiang, W. P. Bowen, Univ. of Otago (New Zealand)

Pulse monitoring based on transverse SHG in periodic and disordered media [6801-37]
R. Fischer, D. N. Neshev, The Australian National Univ. (Australia); S. M. Saltiel, The Australian National Univ. (Australia) and Sofia Univ. (Bulgaria); A. A. Sukhorukov, W. Krolikowski, The Australian National Univ. (Australia); A. Arie, Tel-Aviv Univ. (Israel); Y. S. Kivshar, The Australian National Univ. (Australia)

POSTER SESSION

Generation of conical second harmonic waves by nonlinear Bragg diffraction in two-dimensional nonlinear photonic structures [6801-40]
S. M. Saltiel, Australian National Univ. (Australia) and Sofia Univ. (Bulgaria); D. N. Neshev, W. Krolikowski, R. Fischer, Australian National Univ. (Australia); A. Arie, Tel-Aviv Univ. (Israel); Y. S. Kivshar, Australian National Univ. (Australia)

Analysis of mode phase mismatching effect under a multimode interference configuration [6801-43]
J.-K. Hong, S.-S. Lee, Hanyang Univ. (South Korea)

Energy exchange between orthogonally polarized waves by cascaded quasi-phase-matched processes [6801-45]
B. F. Johnston, P. Dekker, Macquarie Univ. (Australia); S. M. Saltiel, Univ. of Sofia (Bulgaria); M. J. Withford, Macquarie Univ. (Australia); Y. S. Kivshar, Australian National Univ. (Australia)

Selectively filled hybrid ARROW fibers [6801-47]
B. T. Kuhlmey, J. Bolger, D. Wu, Univ. of Sydney (Australia); H. Giessen, Univ. Stuttgart (Germany); B. J. Eggleton, Univ. of Sydney (Australia)

Characterisation of fs-laser written refractive index changes using near-field scanning optical microscopy [6801-48]
D. Little, P. Dekker, Macquarie Univ. (Australia); A. Rahmani, Univ. of Technology Sydney (Australia); J. Dawes, G. Marshall, M. Withford, Macquarie Univ. (Australia)

Self-assembly around curved surfaces [6801-50]
L. A. Stewart, G. D. Marshall, J. M. Dawes, M. J. Withford, Macquarie Univ. (Australia); A. Rahmani, Macquarie Univ. (Australia) and Univ. of Technology (Australia)

Flatness and defect measurements for a plane glass using a heterodyne SPR sensor [6801-54]

Dynamic laser beam stabilization for terahertz systems [6801-57]
G.-H. Chua, T. Rainsford, W. K. Tan, I. Linke, The Univ. of Adelaide (Australia)
Transmission characteristics of T-ray multilayer interference filters [6801-58]
W. Withayachumnankul, B. M. Fischer, S. P. Mickan, D. Abbott, The Univ. of Adelaide (Australia)

Stepped mirrored structures for generating true time delays in stationary optical delay line proof-of-principle experiments for application to optical coherence tomography [6801-59]
P. V. Jansz, G. Wild, S. Hinckley, Edith Cowan Univ. (Australia)

Temporal nonlinear beam dynamics in infiltrated photonic-crystal fibers [6801-60]
F. H. Bennet, C. R. Rosberg, D. N. Neshev, W. Krolikowski, Y. S. Kivshar, The Australian National Univ. (Australia); P. D. Rasmussen, O. Bang, A. Bjarklev, Technical Univ. of Denmark (Denmark)

Fabrication and characterisation of metal-clad optical waveguides [6801-63]
T. Lunn, V. Sivan, L. Bui, A. Mitchell, RMIT Univ. (Australia)

Chip-to-chip optical link by using optical wiring method [6801-64]
I.-K. Cho, S. H. Ahn, Electronics and Telecommunications Research Institute (South Korea); M.-Y. Jeong, Pusan National Univ. (South Korea); B. S. Rho, Korea Photonics Technology Institute (South Korea); H. H. Park, Information and Communications Univ. (South Korea)

Dispersion of the complex cubic nonlinearity in two-photon absorbing organic and organometallic chromophores [6801-66]
M. Samoc, A. Samoc, G. T. Dalton, M. P. Cifuentes, M. G. Humphrey, The Australian National Univ. (Australia); P. A. Fleitz, Air Force Research Lab. (USA)

Field propagation with nearly constant Gaussian beam parameters in unbiased self-defocusing photorefractive media [6801-67]
M. W. Jones, E. Jaatinen, Queensland Univ. of Technology (Australia)

Aspherical lenses for terahertz spectroscopy [6801-69]
Y. H. Lo, R. Leonhardt, Univ. of Auckland (New Zealand)
Conference Committee

Symposium Chairs
Tiziana Di Matteo, The Australian National University (Australia)
Vijay K. Varadan, University of Arkansas (USA)

Conference Chair
Wieslaw Z. Krolikowski, The Australian National University (Australia)

Conference Cochairs
Costas M. Soukoulis, Iowa State University (USA)
Ping Koy Lam, The Australian National University (Australia)
Timothy J. Davis, Commonwealth Scientific and Industrial Research Organisation (Australia)
Shanhui Fan, Stanford University (USA)
Yuri S. Kivshar, The Australian National University (Australia)

Program Committee
Derek Abbott, The University of Adelaide (Australia)
Kamal Alameh, Edith Cowan University (Australia)
David D. Awschalom, University of California, Santa Barbara (USA)
Hans A. Bachor, The Australian National University (Australia)
Kenneth G. H. Baldwin, The Australian National University (Australia)
Ole Bang, Danmarks Tekniske Universitet (Denmark)
Jung-Chih Chiao, The University of Texas, Arlington (USA)
Annette Dowd, University of Technology, Sydney (Australia)
Benjamin J. Eggleton, The University of Sydney (Australia)
Bernd M. Fischer, The University of Adelaide (Australia)
Kenneth J. Grant, Defence Science and Technology Organisation (Australia)
Min Gu, Swinburne University of Technology (Australia)
Kodo Kawase, Nagoya University (Japan)
Roger A. Lewis, University of Wollongong (Australia)
Andre Luiten, The University of Western Australia (Australia)
Barry Luther-Davies, The Australian National University (Australia)
Neil B. Manson, The Australian National University (Australia)
Robert E. Miles, University of Leeds (United Kingdom)
Tanya M. Monro, The University of Adelaide (Australia)
Jesper Munch, The University of Adelaide (Australia)
Session Chairs

1. **Plasmonic Nanophotonics**
   - Wieslaw Z. Krolikowski, The Australian National University (Australia)

2. **Photonic Devices I**
   - Ole Bang, Danmarks Tekniske Universitet (Denmark)

3. **Nonlinear Effects and Devices**
   - Barry Luther-Davies, The Australian National University (Australia)

4. **Surface Waves in Bandgap Materials**
   - Joachim Herrmann, Max-Born-Institut für Nichtlineare Optik und Kurzzeitspektroskopie (Germany)

5. **Materials and Structures**
   - Joseph W. Haus, University of Dayton (USA)

6. **Photonic Devices II**
   - Henri J. Lezec, California Institute of Technology (USA)

7. **Quantum Effects in Nanostructures**
   - Yuri S. Kivshar, The Australian National University (Australia)

8. **Bandgap Structures**
   - Min Gu, Swinburne University of Technology (Australia)

9. **Photonic Devices III**
   - John M. Dell, The University of Western Australia (Australia)
Introduction

This conference on Photonics: Design, Technology, and Packaging is part of the SPIE 2007 symposium on Microelectronics, MEMS, and Nanotechnology held at The Manning Clark Centre, Australian National University (ANU), Canberra, 4–7 December 2007. Four other parallel conferences were held as part of this symposium, as follows: (i) Microelectronics: Design, Technology, and Packaging, (ii) BioMEMS and Nanotechnology, (iii) Device and Process Technologies for Microelectronics, MEMS, Photonics, and Nanotechnology, and (iv) Complex Systems.

The papers in these proceedings represent some of the latest research issues in bandgap materials and devices, photonic structures, nonlinear optics and plasmonics. In order to comply with the requirements of some institutions, the authors were able to have their full manuscripts peer reviewed by the international conference committee and other experts in the relevant fields.

A big thanks to the symposium chairs, Tiziana Di Matteo (Australian National University) and Vijay K. Varadan (University of Arkansas) for their splendid work. A special thanks to our program committee for their support and labors. Finally, our appreciation must go to the authors for sharing their work, the attendees for their stimulating questions, and both the authors and attendees for their enthusiasm. The resulting interaction made this a most productive and enjoyable conference.
