Proceedings of SPIE, 1605-7422, V. 11603

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Medical Imaging 2021: Digital Pathology, edited by John E. Tomaszewski,
Aaron D. Ward, Proc. of SPIE Vol. 11603, 1160301 · © 2021 SPIE
CCC code: 1605-7422/21/$21 · doi: 10.1117/12.2595414

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

GRADING AND CLASSIFICATION OF PATHOLOGY IMAGES

11603 04 **Neural image compression for non-small cell lung cancer subtype classification in H&E stained whole-slide images** [11603-1]

11603 05 **Bladder cancer organoid image analysis: textured-based grading** [11603-2]

11603 06 **Grading and localization of histological features for bioengineered kidney constructs** [11603-3]

11603 07 **End-to-end classification on basal-cell carcinoma histopathology whole-slides images** [11603-4]

11603 08 **A multi-scale conditional deep model for tumor cell ratio counting** [11603-5]

11603 09 **Harnessing generative adversarial networks to generate synthetic mitosis images for classification of cell images** [11603-6]

COMPUTER-AIDED DIAGNOSIS, PROGNOSIS, AND PREDICTIVE ANALYSIS

11603 0A **Identifying lung imaging biomarkers of BCG vaccination after infection with Mycobacterium tuberculosis** [11603-7]

11603 0B **Quantitative analysis of Alzheimer's disease pathology in glioblastoma patients** [11603-8]

11603 0C **A computational prediction method based on modified U-Net for cell distribution in tumor microenvironment** [11603-9]

11603 0D **Medulloblastoma tumor classification using deep transfer learning with multi-scale EfficientNets** [11603-10]

SEGMENTATION OF CELLULAR AND TISSUE STRUCTURES

11603 0F **Automated detection and quantification of Wilms' Tumor 1-positive cells in murine diabetic kidney disease** [11603-12]

11603 0G **Whole slide semantic segmentation: large scale active learning for digital pathology** [11603-13]

11603 0H **Active deep learning reduces annotation burden in automatic cell segmentation** [11603-14]

11603 0I **Simple non-iterative clustering and CNNs for coarse segmentation of breast cancer whole slide images** [11603-15]

11603 0J **User friendly, cloud based, whole slide image segmentation** [11603-16]

11603 0K **Automatic glomerulus detection in renal histological images** [11603-17]

EMERGING METHODS AND INTEGRATION OF MULTIMODAL AND SPATIAL INFORMATION

11603 0L **Clot organization on histology is associated with radiomics features that predict treatment outcomes from mechanical thrombectomy** [11603-18]

11603 0N **Few-shot weakly supervised detection and retrieval in histopathology whole-slide images** [11603-20]

11603 0O **Conditional generative adversarial networks for H&E to IF domain transfer: experiments with breast and prostate cancer** [11603-21]

MULTISPECTRAL AND MULTIPLEXED IMAGING AND ANALYSIS

11603 0P **Hyperspectral microscopic imaging for the detection of head and neck squamous cell carcinoma on histologic slides** [11603-22]

11603 0Q **Automatic detection of head and neck squamous cell carcinoma on pathologic slides using polarized hyperspectral imaging and machine learning** [11603-23]

11603 0R **Approximate explicit feature map for computational augmentation of RGB images of hematoxylin and eosin stained histopathological specimens** [11603-24]

11603 0S **Combatting out-of-distribution errors using model-agnostic meta-learning for digital pathology** [11603-25]

11603 0T **Co-registration tool for large format whole mount prostate multi-plex histology** [11603-26]

11603 0U **Colorimetrical evaluation of color normalization methods for H&E-stained images** [11603-27]

POSTER SESSION

11603 0V **A distributed system improves inter-observer and AI concordance in annotating interstitial fibrosis and tubular atrophy** [11603-28]

11603 0W **Effect of formalin fixing on chromophore saliency maps derived from multi-spectral macropathology skin images** [11603-29]

11603 0X **Comparing architectural features between heuristically human-annotated and Artificial Intelligence (AI) generated tumor and satellite labels in early-stage oral cavity cancer** [11603-30]

11603 0Y **Histological grading of the prostate carcinoma using deep learning: an unsupervised approach** [11603-31]

11603 0Z **Eye tracking in digital pathology: identifying expert and novice patterns in visual search behaviour** [11603-32]

11603 10 **Multiple-datasets and multiple-label based color normalization in histopathology with cGAN** [11603-33]

11603 11 **Breast cancer magnification-independent multi-class histopathology classification using dual-step model** [11603-34]

11603 12 **Accurate pathological patch classification with regression** [11603-35]

11603 13 **Managing class imbalance and differential staining of immune cell populations in multi-class instance segmentation of multiplexed immunofluorescence images of Lupus Nephritis biopsies** [11603-36]

11603 14 **In silico multi-compartment detection based on multiplex immunohistochemical staining in renal pathology** [11603-37]

11603 15 **Distance ordinal regression loss for an improved nuclei segmentation** [11603-38]

11603 16 **Three-dimensional shape and topology analysis of tissue-cleared tumor samples (Cum Laude Poster Award)** [11603-39]

11603 17 **Application and generalizability of U-Net segmentation of immune cells in inflamed tissue** [11603-40]

11603 18 **Reproducibility in deep learning algorithms for digital pathology applications: a case study using the CAMELYON16 datasets** [11603-41]
