

PROCEEDINGS OF SPIE

# ***2021 International Conference on Neural Networks, Information and Communication Engineering***

**Zhiyong Zhang**  
*Editor*

**August 27–29, 2021**  
**Qingdao, China**

*Organized by*  
Henan University of Science and Technology (China)

*Sponsored by*  
AEIC Academic Exchange Information Centre (China)

*Published by*  
SPIE

**Volume 11933**

Proceedings of SPIE 0277-786X, V. 11933

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

2021 International Conference on Neural Networks, Information and Communication Engineering, edited by  
Zhiyong Zhang, Proc. of SPIE Vol. 11933, 1193301 · © 2021 SPIE · 0277-786X · doi: 10.1117/12.2616760

Proc. of SPIE Vol. 11933 1193301-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *2021 International Conference on Neural Networks, Information and Communication Engineering*, edited by Zhiyong Zhang, Proc. of SPIE 11933, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

## **SESSION 1      NEURAL NETWORK AND ARTIFICIAL INTELLIGENCE ALGORITHM APPLICATION**

---

- 11933 02      **A new item recommendation algorithm based on convolutional neural network [11933-78]**
- 11933 03      **A multi-gene genetic algorithm for the Flappy Bird game based on neural network [11933-66]**
- 11933 04      **Prediction and control of carbon emissions of electric vehicles based on BP neural network under carbon neutral background [11933-110]**
- 11933 05      **Rolling bearing fault diagnosis based on continuous wavelet transform and transfer convolutional neural network [11933-82]**
- 11933 06      **Research on risk prediction techniques of multi-sensing pyrolytic particle electrical fire in heritage buildings based on BP neural network [11933-56]**
- 11933 07      **Channel quality evaluation based on Elman neural network [11933-47]**
- 11933 08      **Evaluation of scientific research capability based on neural network [11933-108]**
- 11933 09      **Research on enhancement algorithm for small-scale focus-spot detection [11933-7]**
- 11933 0A      **Improved Dijkstra algorithm based on a new storage method [11933-97]**
- 11933 0B      **Research on Chinese classification based on TF-IDF [11933-100]**
- 11933 0D      **Network link prediction based on machine learning methods [11933-105]**
- 11933 0E      **Research on complex path optimization based on data mining [11933-51]**
- 11933 0F      **A design of command and control system based on neural network decision-making support algorithm [11933-52]**
- 11933 0G      **Urban PM2.5 prediction based on temporal convolution network [11933-54]**
- 11933 0H      **Research on the prediction of suspect at the airport based on big data [11933-63]**
- 11933 0I      **Short-term demand forecasting of shared bicycles based on long short-term memory neural network and climate characteristics [11933-31]**
- 11933 0J      **Humor prediction with bi-directional long-short term memory [11933-75]**

- 11933 OK **A hierarchical reinforcement learning method on multi UCAV air combat [11933-89]**
- 11933 OL **Comparative study on deep learning models in humor detection [11933-71]**
- 11933 OM **The research of case retrieval system based on deep learning [11933-80]**
- 11933 ON **Research on abnormal network traffic detection based on 1D-CNN [11933-74]**
- 11933 OO **Research on higher vocational education training reform based on BP neural network [11933-114]**
- 11933 OP **Research on judgment system of legal cases based on neural network [11933-83]**
- 11933 OQ **HIMA-Net: humor prediction by self-attention based on key information related to humor [11933-73]**
- 11933 OR **Research on development model of weapon equipment construction based on system dynamics [11933-28]**
- 11933 OS **AHP and BP neural network-based evaluation model of higher vocational PBL english learning [11933-57]**
- 11933 OT **A deep learning training method of water identification based on the Third National Land Survey data [11933-41]**
- 11933 OU **Digital media information sharing platform in Internet Era [11933-116]**
- 11933 OV **Research on the attack strategy to reduce network effectiveness based on weighted topological separation ratio [11933-90]**
- 11933 OW **Traffic accident duration prediction based on natural language processing and a hybrid neural network architecture [11933-32]**

---

**SESSION 2 SIGNAL IMAGE PROCESSING AND INFRARED REMOTE SENSING TECHNOLOGY**

- 11933 OX **Remote sensing images target detection based on deep learning [11933-99]**
- 11933 OY **Design and implementation of full-body motion capture system based on multi-sensor fusion [11933-68]**
- 11933 OZ **Numerical simulation of laser-EMAT testing depth of surface crack technology [11933-48]**
- 11933 10 **Optical fiber Fabry-Perot cavity interference magnetic field sensor [11933-3]**
- 11933 11 **Research on voiceprint recognition based on depth learning [11933-93]**

- 11933 12 **Symmetric multiplexing 2×2 guideway optical switch based on phase change material** [11933-10]
- 11933 13 **A single-frame and multi-frame based method for non-uniformity correction in uncooled infrared camera** [11933-87]
- 11933 14 **Semantic segmentation of remote sensing images based on deep learning methods** [11933-46]
- 11933 15 **Flow count synchronous SDN address hopping technology based on DH-RSA negotiation** [11933-37]
- 11933 16 **Research on 3D reconstruction of human face based on single image** [11933-61]
- 11933 17 **A new method for swallowing detection with binocular vision during radiotherapy** [11933-67]
- 11933 19 **Recognition of radar emitter signal images using encoding signal methods** [11933-59]
- 11933 1A **Ship path follow based on active disturbance rejection control** [11933-58]
- 11933 1B **Nonlinear regime of laser-induced acoustic in the liquid** [11933-38]
- 11933 1C **Visual detection system of powder mixing equipment based on PLC** [11933-111]
- 11933 1D **Identification of faulty station area line loss based on the fusion of cross attention and deep learning algorithm** [11933-88]
- 11933 1E **Research on the application of machine learning in the field of speech recognition and path planning** [11933-113]
- 11933 1F **A photoelectric payload for visual self-inspection of planetary rovers** [11933-19]
- 11933 1G **Optimal grazing angle acquisition method for traffic arteries communication signal coverage based on power lobe rotation** [11933-60]
- 11933 1H **An acoustic study on the whispery voice** [11933-98]
- 11933 1I **Innovative research plane figure applied computer graphics image processing technology Zodiac style of woodblock New Year pictures** [11933-55]
- 11933 1K **Practice of digital restoration in paleontology research and publicity** [11933-35]

---

**SESSION 3 ELECTRONIC COMMUNICATION ENGINEERING AND RADAR POSITIONING MONITORING**

- 11933 1L **Optimization target variable ultraviolet optical communication network fault tolerant topology control method** [11933-20]

- 11933 1M **3D deployment algorithm for UAV base station load capacity enhancement** [11933-1]
- 11933 1N **Ultra-wideband multi-beam forming of the synthesized RF system based on true-time-delay technique** [11933-9]
- 11933 1O **Wideband millimeter-wave antenna array for the 5G communication based on ME dipole** [11933-2]
- 11933 1P **Analysis of single event upset on certain type of calibration satellite and research on the correlation characteristics** [11933-91]
- 11933 1Q **A target detection algorithm with local space embedded attention** [11933-102]
- 11933 1R **Optimal routing method for computer communication network based on Tabu search** [11933-115]
- 11933 1S **A deep learning method for LiDAR bathymetry waveforms processing** [11933-45]
- 11933 1T **Radar emitter recognition based on CNN and LSTM** [11933-62]
- 11933 1U **UAV formation control based on combining consensus control and artificial potential field** [11933-104]
- 11933 1V **Design of IEEE 802.1AS time synchronization system based on FPGA** [11933-4]
- 11933 1W **Wireless UV light UAV inter-aircraft avoidance algorithm based on target trajectory prediction** [11933-18]
- 11933 1X **An optimal algorithm for infrared cooperative positioning** [11933-16]
- 11933 1Y **Time-frequency domain pattern analysis of Tai Chi 12 GONG FA based on skeleton key points detection** [11933-50]
- 11933 1Z **Holographic communication technology** [11933-43]
- 11933 20 **An improved approach for iterative nodes localization by using artificial bee colony** [11933-109]
- 11933 21 **Robot path planning based on external parameter calibration and parameter fusion** [11933-112]
- 11933 22 **Research on communication and positioning technology of intelligent operation and maintenance system for transmission line** [11933-64]
- 11933 23 **Task scheduling algorithm based on backtracking strategy for phased array radar** [11933-77]
- 11933 24 **Research on multimedia digital platform based on ergonomics** [11933-29]
- 11933 25 **Through the bamboo forest: application of UAV in a Linpan development project** [11933-30]

11933 26 **The design and measurement of a multi-purpose performance concert hall with adjustable reverberation** [11933-33]

---

**SESSION 4 INTEGRATED CIRCUIT AND COMPUTER SIMULATION MODEL DESIGN**

---

11933 27 **Laser fabrication of stretchable graphene supercapacitors** [11933-26]

11933 28 **F-PEAI induced performance improvement for perovskite solar cells** [11933-22]

11933 29 **A design scheme of plug-in key intelligent lock with unique identity authentication ID** [11933-14]

11933 2A **Modeling and analysis of vibration characteristics of all fiber current sensor** [11933-24]

11933 2B **Research on ultra-high speed laser cladding process of corrosion resistant layer of tungsten rod for molten salt electrolysis** [11933-17]

11933 2C **An LSTM-based model for evaluation of the risk of ground collapse in coal mining area** [11933-36]

11933 2D **A streaming data prediction method based on long short-term memory model and grey model** [11933-103]

11933 2E **BERT-based regression model for micro-edit humor classification task** [11933-69]

11933 2F **Design of a single channel Doppler direction finding system** [11933-65]

11933 2G **Application of improved adaptive genetic algorithm in energy consumption optimization of electric refrigerated vehicles** [11933-92]

11933 2H **Improvement of cyclic stability of V<sub>2</sub>O<sub>5</sub> electrochromic films via polymer tetrabutylammonium perchlorate** [11933-21]

11933 2I **Unimorph deformable mirror for oblique incidence applications** [11933-11]

11933 2J **An automatic trading system based on the transaction model that selects advantageous trading opportunities and increases positions** [11933-79]

11933 2K **The true single-port comparator in multiple channel SAR ADC** [11933-86]

11933 2L **Design of dry-type transformer temperature controller based on MCU** [11933-49]

11933 2M **Research on the combined model of corporate failure prediction** [11933-40]

11933 2N **Method for predicting behavior of substation workers based on generative confrontation network** [11933-72]

- 11933 2O **Safe distance monitoring method of substation based on machine vision [11933-107]**
- 11933 2P **The construction and application of a quantitative trading system based on a trading model that repeatedly trades at the same price [11933-81]**
- 11933 2Q **Research on edge service random access technology for continuous guarantee [11933-96]**
- 11933 2R **Combinatorial selective redundant transmissions of real-time video stream through multi-interface wireless terminals [11933-84]**
