Proc. of SPIE Vol. 12356 1235601-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Endoscopic Microscopy XVIII*, edited by Guillermo J. Tearney, Thomas D. Wang, Melissa J. Suter, Proc. of SPIE 12356, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

NOVEL ENDOSCOPY DESIGN

12356 02 **Iterative prototyping based on lessons learned from the falloposcope in vivo pilot study experience** [12356-7]

12356 03 **Cell-acquiring fallopian endoscope for detection of ovarian cancer via reflectance imaging, fluorescence imaging, and cell collection** [12356-11]

NOVEL LENS DEVELOPMENT FOR ENDOSCOPY

12356 04 **Design and evaluation of miniaturized high numerical aperture and large field-of-view microscope objectives with reduced field curvature** [12356-14]

12356 05 **Low-cost high-precision polymer optics for single-use endoscopic applications** [12356-15]

12356 06 **Diffractive metasurface light-shaping from fiber endoscope probes for increased depth of field** [12356-16]

2P AND MULTIPHOTON ENDOSCOPY

12356 07 **Optical design and simulation of two photon fluorescence imaging microendoscope with aberration correction** [12356-25]

12356 08 **Design of multiphoton microendoscope system for minimally invasive detection of cancer** [12356-26]

12356 09 **Rigid endomicroscopic system for multiphoton imaging and tissue ablation in the head and neck region** [12356-27]

12356 0A **2p autofluorescence imaging endoscope for clinical observation of metabolic changes in cervical tissue** [12356-28]

12356 0B **Large band multiphoton microendoscope with single-core standard graded-index multimode fiber based on spatial beam self-cleaning** [12356-29]

Conference Committee

Symposium Chairs

Sergio Fantini, Tufts University (United States)
Paola Taroni, Politecnico di Milano (Italy)

Symposium Co-chairs

Jennifer K. Barton, The University of Arizona (United States)
Wolfgang Drexler, Medizinische Universität Wien (Austria)

Program Track Chairs

Brian Jet-Fei Wong, Beckman Laser Institute and Medical Clinic
(United States) and University of California, Irvine (United States)
Eva M. Sevick, The University of Texas Health Science Center at
Houston (United States)

Conference Chairs

Guillermo J. Tearney, Massachusetts General Hospital (United States)
Thomas D. Wang, University of Michigan (United States)
Melissa J. Suter, Massachusetts General Hospital (United States)

Conference Program Committee

Kathy Beaudette, Castor Optics, Inc. (Canada)
Matthew Brenner, Beckman Laser Institute and Medical Clinic
(United States)
Johannes F. de Boer, Vrije Universiteit Amsterdam (Netherlands)
Arthur F. Gmitro, The University of Arizona (United States)
Michalina J. Gora, Université de Strasbourg (France)
Lida P. Hariri, Massachusetts General Hospital (United States)
Stephen Lam, BC Cancer Research Institute (Canada)
Amy L. Oldenburg, The University of North Carolina at Chapel Hill
(United States)
Wibool Piyawattanametha, King Mongkut's Institute of Technology
Ladkrabang (Thailand)
DongKyun Kang, Wyant College of Optical Sciences (United States)
David D. Sampson, University of Surrey (United Kingdom)
Eric J. Seibel, University of Washington (United States)
