

PROCEEDINGS OF SPIE

Seventeenth Conference on Education and Training in Optics and Photonics: ETOP 2023

**David J. Hagan
Mike McKee**
Editors

**15–18 May 2023
Cocoa Beach, Florida, United States**

Sponsored by
CREOL, The College of Optics and Photonics
University of Central Florida
ICO–International Commission for Optics
IEEE–The Photonics Society
Optica
SPIE

Organized by
CREOL, The College of Optics and Photonics
University of Central Florida

Published by
SPIE

Volume 12723

Proceedings of SPIE 0277-786X, V. 12723

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Seventeenth Conference on Education and Training in Optics and Photonics: ETOP 2023,
edited by David J. Hagan, Mike McKee, Proc. of SPIE Vol. 12723, 1272301
© 2023 SPIE · 0277-786X · doi: 10.1117/12.2691518

Proc. of SPIE Vol. 12723 1272301-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Seventeenth Conference on Education and Training in Optics and Photonics: ETOP 2023*, edited by David J. Hagan, Mike McKee, Proc. of SPIE 12723, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY
SPIDigitalLibrary.org

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

EDUCATION AND TRAINING IN OPTICS AND PHOTONICS

- 12723 02 **Beyond maxima and minima: a hands-on approach for undergraduate teaching of diffraction** [12723-2]
- 12723 03 **Biophotonics for all: light transport through tissue** [12723-3]
- 12723 04 **Optical communication system (OptiSystem) software enabling remote education and teaching** [12723-4]
- 12723 06 **STEM educational resource to send data via laser: using micro:bit and a USB GPIO module** [12723-7]
- 12723 07 **Developing a classroom system to visualize wave optics phenomena** [12723-10]
- 12723 08 **Course structure for the University of Rochester's Hybrid Optics Masters Education (HOME) program** [12723-11]
- 12723 09 **Experiments in optics and photonics engineering education at Penn State** [12723-12]
- 12723 0A **Training the future photonics research leaders: a summer fellowship programme to attract students to pursue a career in photonics research** [12723-15]
- 12723 0B **Sustainable education in the age of the second quantum revolution: fifteen years of the University of Rochester National Science Foundation supported efforts** [12723-19]
- 12723 0C **Develop the innovative and pioneering concepts for photonics and optics outreach program** [12723-20]
- 12723 0E **Lessons we learned when creating four massive open online courses (MOOCs)** [12723-22]
- 12723 0F **Teaching through history: the preservation of modern French scientific heritage in optics** [12723-23]
- 12723 0H **Research-practice partnerships and communities of practice for fostering better teaching and learning** [12723-30]
- 12723 0I **Students' reflections on the impact of paid summer photonics research internships** [12723-31]
- 12723 0K **Undergraduate research training boot camp using thin-film optics technology** [12723-35]

- 12723 OL **Let science come to your space: delivering astronomy and optics outreach activities outside the cities** [12723-37]
- 12723 OM **Outreach experiments guide for an optic show to pre-college level by Medellin student chapter** [12723-38]
- 12723 ON **3D integral imaging sensing and visualization: an undergraduate project-based learning** [12723-39]
- 12723 OO **Proposal for teaching optics to blind people through the workshop called My Hands See** [12723-40]
- 12723 OR **Transmission convergence layer analysis of passive optical networks with a novel FPGA card** [12723-45]
- 12723 OS **Teaching an introductory optics lab course for mechanical engineering students** [12723-46]
- 12723 OU **Active learning of optics and photonics including virtual options (Invited Paper)** [12723-50]
- 12723 OW **The PBL projects: genesis and evolution (Invited Paper)** [12723-52]
- 12723 OX **A study of the skills required by the Canadian photonics industry** [12723-54]
- 12723 OY **Integrated testlets in optics and photonics: an assessment tool suitable for textbook and online delivery** [12723-55]
- 12723 OZ **Laboratories-first optics and photonics education: analyzing epistemic insights in an educational program (Invited Paper)** [12723-57]
- 12723 13 **The usage of immersive technologies in learning environments** [12723-62]
- 12723 14 **Developing technical and soft skills in an introductory undergraduate optics course** [12723-63]
- 12723 17 **Flipped classroom approach in optoelectronics course for electronic and information engineering students** [12723-66]
- 12723 18 **Practical training of stellar interferometry by measuring spectral fringes visibilities** [12723-67]
- 12723 19 **Dynamic curricular concepts for research orientated programs in optics and photonics: the importance of consistent evaluation** [12723-68]
- 12723 1B **The impact of the International Year of Light and its legacy (Invited Paper)** [12723-71]
- 12723 1C **Innovative approaches for training precision optics technicians** [12723-72]
- 12723 1D **Optical Sciences Winter School for enabling future students in optics society** [12723-73]
- 12723 1E **Smartphone-based approach to demonstrating relativistic aberration of light using electronic circuit analogues for undergraduates in the Philippines** [12723-74]

- 12723 1F **New experiments/phenomena in optics: photoelectric effect to photowave phenomena** [12723-75]
- 12723 1G **Concept connectivity: an educational and research framework for scientific learning in optics, photonics, and electronic education** [12723-76]
- 12723 1I **If you build it, they will come: creating ecosystems to produce the next generation of optics technicians (Invited Paper)** [12723-79]
- 12723 1K **Asymmetric Fabry-Perot cavity onto optical fibre tip to developing high performance sensing devices** [12723-85]
- 12723 1L **Beyond ray optics: building photonics intuition for waveguide modes using digital simulations and games** [12723-87]
- 12723 1M **Learning optics and electrodynamics as part of the bachelor of information technology security curriculum** [12723-88]
- 12723 1O **Photonic systems integration for postgraduate students in the centre for doctoral training in applied photonics** [12723-90]
- 12723 1Q **Thirty-five years of optics education at Rose-Hulman: from optical sciences to optical engineering, 3 cycles of ABET accreditation** [12723-92]
- 12723 1R **The influence of education and professional experience on misconceptions in optics in optometry** [12723-93]
- 12723 1T **Integration of a constructed lamp-based spectral calibration station into a radiometry course** [12723-95]
- 12723 1U **A tabletop rotor kit as training platform for fiber optic-based sensing** [12723-96]
- 12723 1V **Introduction to holography at undergraduate level using research-grade open-source software** [12723-98]
- 12723 1W **Extending education and outreach in optics with the visually and hearing impaired** [12723-99]
- 12723 1Y **The Massachusetts LEAP network: building a template for a hands-on advanced manufacturing hub in integrated photonics** [12723-101]
- 12723 22 **The success story of the photonics-related curriculum concept developed in the engineering study program from undergraduate to graduate** [12723-106]
- 12723 23 **Science is also a women's thing: a meeting between girls and female scientists** [12723-107]
- 12723 24 **10 years of Photonics Explorer Kit and the future** [12723-108]
- 12723 25 **Teaching optics with LightFlow: an intuitive framework for light propagation simulations** [12723-109]

- 12723 26 **Outreach education in optics: International Day of Light activities for under-privileged school students** [12723-112]
- 12723 28 **Toy box optics: bringing optical technologies home and to schools** [12723-114]
- 12723 29 **Authentic assessment in optics and photonics** [12723-116]
- 12723 2H **Key stakeholders' interpretations of scientific information literacy: a survey of Orange and Seminole County K-16 educators** [12723-125]
- 12723 2L **Intelligent cloud teaching of photoelectric courses** [12723-133]
- 12723 2M **Using Cloud Class + for online and offline hybrid teaching interaction mode: the case of the applied optics course** [12723-135]
- 12723 2Q **Leveraging dual-process theories of reasoning to understand and support student reasoning** [12723-142]

QUANTUM EDUCATION SYMPOSIUM

- 12723 2R **Teaching quantum to high school students** [12723-9]
- 12723 2S **Preparing for a future with quantum technologies: an innovative approach to accessible quantum education** [12723-24]
- 12723 2T **Experimental elective in quantum science and technologies for master level course** [12723-25]
- 12723 2U **Measuring Wigner functions of quantum states of light in the undergraduate lab** [12723-27]
- 12723 2Y **Educating decision makers on resource allocations for quantum technologies** [12723-47]
- 12723 2Z **Quantum optics laboratories with motorized components (Invited Paper)** [12723-48]
- 12723 31 **Quantum education: how to teach a subject that nobody fully understands (Invited Paper)** [12723-56]
- 12723 32 **Should we trade off higher-level mathematics for abstraction to improve student understanding of quantum mechanics?** [12723-69]
- 12723 34 **Quantum mechanics in a quicker, more intuitive, and accessible way** [12723-83]

Conference Committee

Conference Chairs

David J. Hagan, CREOL, The College of Optics and Photonics,
University of Central Florida (United States)
Mike McKee, CREOL, The College of Optics and Photonics, University
of Central Florida (United States)

ETOP Local Committee

Natalia Chekhovskaya Kearney, LASER-TEC and Indian River State
College (United States)
Svetlana G. Lukishova, The Institute of Optics, University of Rochester
(United States)
Kyu Young Han, CREOL, The College of Optics and Photonics,
University of Central Florida (United States)
Carolyn McMorran, Valencia College (United States)
Barron Mills, CREOL, The College of Optics and Photonics, University
of Central Florida (United States)
Ali Notash, Valencia College (United States)
Denise Whiteside, CREOL, The College of Optics and Photonics,
University of Central Florida (United States)
Ethan Teodosio, CREOL, The College of Optics and Photonics,
University of Central Florida (United States)

Program Committee

Aaron J. Danner, National University of Singapore (Singapore)
Ali Notash, Valencia College (United States)
Andrew Forbes, University of the Witwatersrand, Johannesburg
(South Africa)
Andrew J. Berger, The Institute of Optics, University of Rochester
(United States)
Anil Prabhakar, Indian Institute of Technology Madras (India)
Anne-Sophie Poulin-Girard, Université Laval (Canada)
Brian Monacelli, Jet Propulsion Laboratory (United States) and
Pasadena City College (United States)
Cristina Elizabeth Solano, Centro de Investigaciones en Óptica, A.C.
(Mexico)
Daewook Kim, Wyant College of Optical Sciences (United States)
David J. Hagan, CREOL, The College of Optics and Photonics,
University of Central Florida (United States)
James C. Wyant, Wyant College of Optical Sciences (United States)

Jennifer D. T. Kruschwitz, The Institute of Optics, University of Rochester
(United States)

Jessica Wade, Imperial College London (United Kingdom)

Joseph A. Shaw, Montana State University (United States)

Judith F. Donnelly, Three Rivers Community College (United States)

Julie L. Bentley, The Institute of Optics, University of Rochester
(United States)

Lynn Yu, Massachusetts General Hospital (United States)

María Josefa Yzuel Giménez, Universitat Autònoma de Barcelona
(Spain)

Matthew T. Posner, Excelitas Canada Inc. (Canada)

Mike McKee, CREOL, The College of Optics and Photonics, University
of Central Florida (United States)

Nancy J. Magnani, Sumner Middle School (United States)

Natalia Canas-Estrada, Mynaric AG (Germany)

Natalia Chekhovskaya Kearney, LASER-TEC and Indian River State
College (United States)

Nicholas Heng Loong Wong, GlobalFoundries Singapore Pte. Ltd.
(Singapore)

Nicholas M. Massa, Springfield Technical Community College
(United States)

Patricia F. Mead, Norfolk State University (United States)

Paul O. Leisher, Freedom Photonics, LLC (United States)

Philippe Tassin, Chalmers University of Technology (Sweden)

Jia Hong Ray Ng, A*STAR Institute of High Performance Computing
(Singapore)

Rhys Adams, Vanier College (Canada)

Robert M. Bunch, Rose-Hulman Institute of Technology (United States)

Santiago Camacho-López, The Center for Scientific Research and
Higher Education at Ensenada (Mexico)

Seongwoo Yoo, University of Glasgow (United Kingdom)

Soon Thor Lim, A*STAR Institute of High Performance Computing
(Singapore)

Thomas Pertsch, Friedrich-Schiller- Universität Jena (Germany)

Thomas R. Clark Jr., Johns Hopkins University Applied Physics
Laboratory, LLC (United States)

Vasudevan Lakshminarayanan, University of Waterloo (Canada)

Yukitoshi Otani, Utsunomiya University (Japan)

Bahaa E. A. Saleh, CREOL, The College of Optics and Photonics,
University of Central Florida (United States)

Frank Setzpfandt, Friedrich-Schiller- Universität Jena (Germany)

Svetlana G. Lukishova, The Institute of Optics, University of Rochester
(United States)

Session Chairs

Amanda K. Meier, Front Range Community College (United States)
Carsten Rockstuhl, Karlsruher Institut für Technologie (Germany)
Luc Froehly, FEMTO-ST (France)
Yun-Chorng Chang, Research Ctr. for Applied Sciences - Academia Sinica (Taiwan)
Yukitoshi Otani, Utsunomiya University (Japan)
Svetlana G. Lukishova, The Institute of Optics, University of Rochester (United States)
Josanne DeNatale, American Ctr. for Optics Manufacturing, Inc. (United States)
Ana Karen Reyes, Universidad Tecnológica de Tulancingo (Mexico)
Carolyn McMorran, Valencia College (United States)
Asta Tamuleviciene, Kaunas University of Technology (Lithuania)
Azad Siahmakoun, Rose-Hulman Institute of Technology (United States)
Daewook Kim, Wyant College of Optical Sciences (United States)
Anne-Sophie Poulin-Girard, Université Laval (Canada)
Daniel S. Renner, Atacama Optics and Electronics (United States)
David M. Giltner, TurningScience, LLC (United States)
Kyu Young Han, CREOL, The College of Optics and Photonics, University of Central Florida (United States)
Rayf Shiell, Trent University (Canada)
Jennifer D. T. Kruschwitz, The Institute of Optics, University of Rochester (United States)
Rhys Adams, Vanier College (Canada)
Hemani Kaushal, University of North Florida (United States)
Edward F. Deveney, Bridgewater State University (United States)
Enrique J. Galvez, Colgate University (United States)
Elisabeth Wintersteller, Tyndall National Institute (Ireland)
Dan Curticapean, Hochschule Offenburg (Germany)
Natalia Chekhovskaya Kearney, LASER-TEC and Indian River State College (United States)
