

PROCEEDINGS OF SPIE

Unmanned Systems Technology IX

Grant R. Gerhart
Douglas W. Gage
Charles M. Shoemaker
Editors

9–12 April 2007
Orlando, Florida, USA

Sponsored and Published by
SPIE—The International Society for Optical Engineering

Proceedings of SPIE—The International Society for Optical Engineering, 9780819466839, v. 6561

SPIE is an international technical society dedicated to advancing engineering and scientific applications of optical, photonic, imaging, electronic, and optoelectronic technologies.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Contents

ix	<i>Conference Committee</i>
xiii	<i>Introduction</i>

SESSION 1 PERCEPTION

- 656102 **Rapid high-confidence intelligent interior mapping** [6561-01]
D. Roberts, D. Warnaar, A. Menozzi, S. Saadat, S. Snarski, Applied Research Associates (USA)
- 656103 **Night-time negative obstacle detection for off-road autonomous navigation** [6561-02]
A. L. Rankin, A. Huertas, L. H. Matthies, Jet Propulsion Lab. (USA)
- 656104 **On-the-move independently moving target detection** [6561-03]
G. Salgian, J. Xiao, S. Samarasekera, R. Kumar, Sarnoff Corp. (USA)
- 656105 **The Army Research Laboratory (ARL) synchronous impulse reconstruction (SIRE) forward-looking radar** [6561-04]
M. Ressler, L. Nguyen, F. Koenig, D. Wong, G. Smith, Army Research Lab. (USA)
- 656106 **Detection, tracking, and avoidance of moving objects from a moving autonomous vehicle** [6561-05]
E. J. Rigas, B. Bodt, Army Research Lab. (USA); R. Camden, L3 Services Group (USA)
- 656107 **A new SMART sensing system for aerospace structures** [6561-06]
D. C. Zhang, P. Yu, S. Beard, P. Qing, A. Kumar, Acellent Technologies, Inc. (USA);
F.-K. Chang, Stanford Univ. (USA)
- 656108 **Precise visual navigation using multi-stereo vision and landmark matching** [6561-07]
Z. Zhu, T. Oskiper, S. Samarasekera, R. Kumar, Sarnoff Corp. (USA)
- 656109 **Angularly sensitive wide field of view micro-sensor construction and new processing paradigm: task oriented optical processing** [6561-08]
J. B. Franck, U.S. Army Night Vision and Electronic Sensors Directorate (USA)

Pagination: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages.

- 65610A **Terrain perception for robot navigation** [6561-09]
R. E. Karlsen, U.S. Army/TARDEC (USA); G. Witus, Turing Associates (USA)
- 65610B **Daredevil: ultra-wideband radar sensing for small UGVs** [6561-10]
B. Yamauchi, iRobot Corp. (USA)
- 65610C **Non-GPS navigation with the personal dead-reckoning system** [6561-11]
L. Ojeda, J. Borenstein, The Univ. of Michigan (USA)
- 65610D **A UAV routing and sensor control optimization algorithm for target search** [6561-12]
G. E. Collins, Toyon Research Corp. (USA); J. R. Riehl, Univ. of California, Santa Barbara (USA); P. S. Vegdahl, Toyon Research Corp. (USA)

SESSION 2 GOVERNMENT PROGRAMS

- 65610E **Intelligent unmanned vehicle systems suitable for individual or cooperative missions** [6561-13]
M. O. Anderson, M. D. McKay, D. C. Wadsworth, Idaho National Lab. (USA)
- 65610F **Perception and mobility research at Defence R&D Canada for UGVs in complex terrain** [6561-14]
M. Trentini, J. Collier, B. Beckman, B. Digney, I. Vincent, Defence R&D Canada-Suffield (Canada)
- 65610G **Cohort: critical science** [6561-15]
B. L. Digney, Defence R&D Canada-Suffield (Canada)

SESSION 3 SAFETY

- 65610J **Objective test and performance measurement of automotive crash warning systems** [6561-18]
S. Szabo, R. J. Norcross, J. A. Falco, National Institute of Standards and Technology (USA)
- 65610K **Micro UAV collision avoidance** [6561-20]
J. Merchant, F. Pope, RPU Technology, Inc. (USA)
- 65610L **Layered-mode selection logic control with fuzzy sensor fusion network** [6561-21]
T. Born, Hendrix College (USA); A. Wright, Univ. of Arkansas at Little Rock (USA)
- 65610M **The effect of collision avoidance for autonomous robot team formation** [6561-22]
M. H. Seidman, S. J. Yang, Rochester Institute of Technology (USA)
- 65610N **Toward safe navigation in urban environments** [6561-23]
C. Ye, Univ. of Arkansas at Little Rock (USA)
- 65610O **Simulating and testing autonomous behaviour in multiple airborne sensor systems** [6561-24]
M. I. Smith, Waterfall Solutions Ltd. (United Kingdom); M. L. Hernandez, M. Cooper, QinetiQ Ltd. (United Kingdom)

SESSION 4 HUMAN ROBOT INTERFACE

- 65610P **Supervised autonomy for robotic inspection (Invited Paper)** [6561-25]
K. L. Moore, Colorado School of Mines (USA); J. Mollerup Larsen, M. Stampe Qvistgaard, Aalborg Univ. (Denmark)
- 65610Q **Integration of an intelligent systems behavior simulator and a scalable soldier-machine interface** [6561-26]
T. Johnson, C. Manteuffel, B. Brewster, DCS Corp. (USA); T. Tierney, U.S. Army RDECOM-TARDEC (USA)
- 65610R **Experiments in augmented teleoperation for mobile robots: I.** [6561-27]
G. Witus, S. Hunt, Turing Associates (USA); R. D. Ellis, Wayne State Univ. (USA)
- 65610S **Results from a long-term study of a portable field robot in urban terrain** [6561-28]
C. Lundberg, National Defence College (Sweden); R. Reinhold, Kungliga Tekniska Högskolan (Sweden); H. I. Christensen, Georgia Institute of Technology (USA)
- 65610T **Modular robotic intelligence system based on fuzzy reasoning and state machine sequencing (Invited Paper)** [6561-83]
B. Sights, G. Ahuja, G. Kogut, E. B. Pacis, H. R. Everett, D. Fellars, S. Hardjadinata, Space and Naval Warfare Systems Ctr., San Diego (USA)
- 65610U **Layered autonomous overwatch: the necessity and feasibility of multiple unmanned systems in combat support** [6561-30]
S. Monckton, B. Digney, G. Broten, S. Penzes, Defence R&D Canada (Canada)
- 65610W **An agent-based approach to decluttering the interfaces of multi-UAV command and control systems** [6561-32]
S. O'Hara, N. Dwyer, 21st Century Systems, Inc. (USA)
- 65610X **Stereo-vision based 3D modeling for unmanned ground vehicles** [6561-33]
S. Se, P. Jasiobedzki, MDA, Space Missions (Canada)
- 65610Y **A scalable soldier-machine interface for human-robotic interaction** [6561-34]
B. A. Samples, DCS Corp. (USA)

SESSION 5 EXTREME MOBILITY

- 656112 **Heading stabilization and anti-rollover for Chaos** [6561-37]
M. Berkemeier, E. Poulson, S. L. King, Autonomous Solutions, Inc. (USA)
- 656113 **OmniTread OT-4 serpentine robot: new features and experiments** [6561-38]
J. Borenstein, M. Hansen, The Univ. of Michigan (USA)
- 656117 **Fuel-cell powered unmanned ground vehicle** [6561-44]
J. S. Meldrum, C. A. Green, G. D. Gwaltney, S. A. Bradley, J. M. Keith, Michigan Technological Univ. (USA); T. F. Podlesak, Army Research Lab. (USA)
- 656118 **Pendulum walker** [6561-45]
P. Muench, A. Marecki, U.S. Army RDECOM/TARDEC (USA)

656119 **Towards solving the mobility issues of unmanned ground vehicles** [6561-47]
S. Odedra, S. D. Prior, M. Karamanoglu, Middlesex Univ. (United Kingdom)

SESSION 6 SELF-ORGANIZING COLLABORATIVE ISR ROBOTIC TEAMS I: JOINT SESSION WITH CONFERENCE 6578

65611B **A man portable hybrid UAV/UGV system** [6561-48]
P. Rudakevych, iRobot West (USA); B. Yamauchi, iRobot (USA)

65611C **Multi-UAV autonomous collaborative behaviors for convoy protection** [6561-49]
Y.-L. Chen, M. Peot, J. Lee, V. Sundareswaran, T. Altshuler, Teledyne Scientific and Imaging (USA)

65611D **Development of a GPS/INS/MAG navigation system and waypoint navigator for a VTOL UAV** [6561-50]
O. Meister, R. Mönikes, J. Wendel, N. Frietsch, C. Schlaile, G. F. Trommer, Univ. of Karlsruhe (Germany)

SESSION 7 SELF-ORGANIZING COLLABORATIVE ISR ROBOTIC TEAMS II: JOINT SESSION WITH CONFERENCE 6578

65611E **Deployable reconnaissance from a VTOL UAS in urban environments** [6561-51]
S. Barnett, J. Bird, A. Culhane, A. Sharkasi, C. Reinholtz, Virginia Tech (USA)

65611F **Structural characteristics via SLDV for a class of morphing micro-air-vehicles** [6561-52]
E. C. Diggs, O. Bilgen, A. Kurdila, K. Kochersburger, D. Inman, Virginia Polytechnic Institute and State Univ. (USA); J. Vignola, Catholic Univ. of America (USA)

65611G **Towards distributed ATR using subjective logic combination rules with a swarm of UAVs** [6561-53]
S. O'Hara, M. Simon, Q. Zhu, 21st Century Systems, Inc. (USA)

65611H **Detection and tracking of objects in an image sequence captured by a VTOL-UAV** [6561-54]
N. Frietsch, O. Meister, C. Schlaile, J. Wendel, G. F. Trommer, Univ. of Karlsruhe (Germany)

65611I **An intelligent algorithm for unmanned aerial vehicle surveillance** [6561-55]
A. Bhargave, B. Ambrose, F. Lin, M. Kazantzidis, Broaddata Communications, Inc. (USA)

65611J **Fault tolerant cooperative control for UAV rendezvous problem subject to actuator faults** [6561-56]
T. Jiang, N. Meskin, E. Sobhani-Tehrani, K. Khorasani, Concordia Univ. (Canada);
C. A. Rabbath, Defence Research and Development Canada (Canada)

65611K **Vision-based sensing for autonomous in-flight refueling** [6561-57]
D. Scott, M. Toal, J. Dale, Octec Ltd. (United Kingdom)

SESSION 8 STANDARDS, METRICS, AND ARCHITECTURES

- 65611L **Urban search and rescue robot performance standards: progress update** [6561-58]
A. Jacoff, E. Messina, National Institute of Standards and Technology (USA)
- 65611M **USARSim: a RoboCup virtual urban search and rescue competition** [6561-60]
S. Balakirsky, C. Scrapper, National Institute of Standards and Technology (USA); S. Carpin, Univ. of California, Merced (USA); M. Lewis, Univ. of Pittsburgh (USA)
- 65611N **Characterizing unmanned system autonomy: contextual autonomous capability and level of autonomy analyses** [6561-61]
H.-M. Huang, National Institute of Standards and Technology (USA); K. Pavsek, L3 Communications Titan Corp. (USA); M. Ragon, The Boeing Co. (USA); J. Jones, Navigator Development Group Inc. (USA); E. Messina, J. Albus, National Institute of Standards and Technology (USA)
- 65611O **Driver aggressivity analysis within the prediction in dynamic environments (PRIDE) framework** [6561-62]
C. Schlenoff, Z. Kootbally, R. Madhavan, National Institute of Standards and Technology (USA)
- 65611P **A time-slotted on-demand routing protocol for mobile ad hoc unmanned vehicle systems** [6561-63]
J. H. Forsmann, Idaho National Lab. (USA); R. E. Hiromoto, Univ. of Idaho (USA); J. Svoboda, Idaho National Lab. (USA)
- 65611Q **Performance evaluation of a 3D imaging system for vehicle safety** [6561-64]
A. M. Lytle, S. Szabo, G. Cheok, K. Saidi, R. Norcross, National Institute of Standards and Technology (USA)

SESSION 9 INTELLIGENT BEHAVIORS AND LEARNING I

- 65611R **Terrain aware inversion of predictive models for high-performance UGVs** [6561-66]
A. Kelly, T. Howard, C. Green, Carnegie Mellon Univ. (USA)
- 65611S **Amphibious modular robotic astrobiology** [6561-67]
M. Yim, B. Shirmohammadi, D. Benelli, Univ. of Pennsylvania (USA)
- 65611T **Symbolic perception-based autonomous driving in dynamic environments using 4D/RCS** [6561-68]
M. Foedisch, R. Madhavan, C. Schlenoff, National Institute of Standards and Technology (USA)

SESSION 10 INTELLIGENT BEHAVIORS AND LEARNING II

- 65611U **Mobile robots traversability awareness based on terrain visual sensory data fusion** [6561-69]
A. Shirkhodaie, Tennessee State Univ. (USA)

- 65611V **Sensor fusion for intelligent behavior on small unmanned ground vehicles** [6561-70]
G. Kogut, G. Ahuja, B. Sights, E. B. Pacis, H. R. Everett, Space and Naval Warfare Systems
Ctr., San Diego (USA)
- 65611W **Utilizing simulation technologies in the development of autonomous platforms** [6561-71]
O. Har, T. Shintel, HarTech Technologies (Israel)
- 65611X **World representations for unmanned vehicles** [6561-73]
G. S. Broten, S. P. Monckton, D. Mackay, J. Collier, Defence Research and Development
Canada-Suffield (Canada)
- 65611Y **Modeling aerodynamic coefficients for autonomous trajectory planning of aerial vehicles
using neural network approach** [6561-74]
P. Xu, K. Vadakveedu, A. Verma, R. J. Mayer, Knowledge Based Systems, Inc. (USA)
- 65611Z **Real-time prediction and diagnostics for unmanned ground vehicle (UGV) mobility**
[6561-75]
H. M. Jaenisch, dttech Systems, Inc. (USA); J. W. Handley, Axiom Corp. (USA); M. L. Hicklen,
dttech Systems, Inc. (USA)

POSTER SESSION

- 656120 **Component based open middleware architecture for autonomous navigation system**
[6561-65]
M. K. Ahn, Y. W. Park, T. Y. Jee, Agency for Defense Development (South Korea)
- 656124 **Avionics sensor simulation and prototype design workstation using COTS reconfigurable
computing technology** [6561-79]
J. Falasco, GE Fanuc Embedded Systems (USA)
- 656125 **Integration of the Fido explosives detector onto the PackBot EOD UGV** [6561-80]
P. Rudakevych, iRobot West (USA); S. Clark, J. Wallace, iRobot Corp. (USA)
- 656127 **Optimal steering of a mobile robot** [6561-82]
G. Cook, George Mason Univ. (USA)

Introduction

The Unmanned Systems Technology IX Conference consisted of ten sessions during a three-and-a-half-day time period devoted to research, development, and engineering discussions of current robotic technologies relevant to commercial and military applications. Wednesday contained two parallel sessions: the first, titled Self-Organizing Collaborative ISR Robotic Teams, was a joint session with Conference 6578, Defense Transformations and Network-Centric Systems. The second parallel session was Human Robot Interface during the morning and Extreme Mobility in the afternoon. Several papers in the joint session discussed collaborative UGV/UAV/manned vehicle collaborative operations on the future battlefield, describing in some detail the role of network-centric warfare in a collaborative environment.

The Perception session contained a number of papers on novel techniques for positive and negative obstacle detection, avoidance, and negotiation. There was considerable discussion on the sensor performance requirements necessary to autonomously navigate in difficult terrain mobility environments. The subjects ranged from bio-inspired sensor paradigms, ultrawideband radar, GPS and dead reckoning systems, LADAR/LIDAR, and vision-based imaging systems. The Government session contained papers from Canadian and U.S. authors that discussed current robotics technology programs.

Other sessions examined current topics on safety issues for UxVs; standards, metrics, and architectures related to urban search and rescue robots; and intelligent behaviors and learning. The poster session contained eight additional papers on a variety of subjects including mobility analysis of robotic platforms, biologically inspired snake robots, and EOD robot explosives detectors.

We hope you enjoy these proceedings and are able to attend our conference next year.

Grant Gerhart
Doug Gage
Chuck Shoemaker
