

PROCEEDINGS OF SPIE

***Advanced Optical Concepts in
Quantum Computing, Memory,
and Communication II***

**Zameer U. Hasan
Alan E. Craig
Philip R. Hemmer**
Editors

**28–29 January 2009
San Jose, California, United States**

Sponsored and Published by
SPIE

Volume 7225

Proceedings of SPIE, 0277-786X, v. 7225

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Advanced Optical Concepts in Quantum Computing, Memory, and Communication II*, edited by Zameer U. Hasan, Alan E. Craig, Philip R. Hemmer, Proceedings of SPIE Vol. 7225 (SPIE, Bellingham, WA, 2009) Article CID Number.

ISSN 0277-786X

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/09/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

The logo for SPIE Digital Library features the word "SPIE" in a bold, sans-serif font above the words "Digital Library" in a smaller, lighter font. To the right of the text is a stylized graphic consisting of three vertical bars of increasing height, resembling a bar chart or a signal waveform.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii *Conference Committee*

SINGLE ATOM OR SPIN FOR QUANTUM COMPUTING

- 7225 03 **Complete coherent control of a single electron spin in a quantum dot using ultrafast optical pulses (Invited Paper)** [7225-02]
D. Press, Stanford Univ. (United States); T. D. Ladd, Stanford Univ. (United States) and National Institute of Informatics (Japan); B. Zhang, Stanford Univ. (United States); Y. Yamamoto, Stanford Univ. (United States) and National Institute of Informatics (Japan)
- 7225 04 **Optoelectronic manipulation of single spins in semiconductors (Invited Paper)** [7225-03]
M. E. Flatté, A. De, Univ. of Iowa (United States); J.-M. Tang, Univ. of New Hampshire (United States); C. E. Pryor, Univ. of Iowa (United States)

NANOSCALE DEVICES AND SENSING

- 7225 08 **Nanophotonic devices in single crystal diamond (Invited Paper)** [7225-07]
P. E. Barclay, C. Santori, K.-M. Fu, R. G. Beausoleil, Hewlett-Packard Labs. (United States)
- 7225 09 **Nanoscale magnetic sensing using spin qubits in diamond (Invited Paper)** [7225-08]
J. R. Maze, Harvard Univ. (United States); P. Cappellaro, Harvard Univ. (United States) and Harvard-Smithsonian Ctr. for Astrophysics (United States); L. Childress, Bates College (United States); M. V. G. Dutt, Univ. of Pittsburgh (United States); J. S. Hodges, Harvard Univ. (United States) and Massachusetts Institute of Technology (United States); S. Hong, L. Jiang, Harvard Univ. (United States); P. L. Stanwix, Harvard-Smithsonian Ctr. for Astrophysics (United States); J. M. Taylor, Massachusetts Institute of Technology (United States); E. Togan, A. S. Zibrov, Harvard Univ. (United States); P. Hemmer, Texas A&M Univ. (United States); A. Yacoby, Harvard Univ. (United States); R. L. Walsworth, Harvard Univ. (United States) and Harvard-Smithsonian Ctr. for Astrophysics (United States); M. D. Lukin, Harvard Univ. (United States)

PHOTOREFRACTIVES AND PHOTONIC CRYSTALS FOR QUANTUM COMPUTING

- 7225 0D **Photon blockade in a photonic crystal cavity with a strongly coupled quantum dot (Invited Paper)** [7225-12]
A. Faraon, I. Fushman, D. Englund, J. Vučković, Stanford Univ. (United States)
- 7225 0E **Photonic structures for QIP in diamond (Invited Paper)** [7225-13]
K.-M. C. Fu, C. Santori, P. E. Barclay, Hewlett-Packard Labs. (United States); N. Meyer, A. M. Holm, Hewlett-Packard Co. (United States); I. Aharonovich, S. Praver, The Univ. of Melbourne (Australia); R. G. Beausoleil, Hewlett-Packard Labs. (United States)

7225 OF **Single photon nonlinear optics in photonic crystals (Invited Paper)** [7225-14]
D. Englund, I. Fushman, A. Faraon, J. Vučković, Stanford Univ. (United States)

7225 OG **Photorefractive time-domain differential detection method for high-precision distinction of phase-modulated signals in holographic data storage** [7225-15]
M. Takabayashi, A. Okamoto, Hokkaido Univ. (Japan)

NEW CONCEPTS AND SYSTEMS

7225 OI **Quantum interference between photons emitted by independent semiconductor single-photon devices (Invited Paper)** [7225-17]
K. Sanaka, Stanford Univ. (United States) and National Institute of Informatics (Japan); A. Pawlis, Stanford Univ. (United States) and Univ. of Paderborn (Germany); T. D. Ladd, Stanford Univ. (United States) and National Institute of Informatics (Japan); K. Lischka, Univ. of Paderborn (Germany); Y. Yamamoto, Stanford Univ. (United States) and National Institute of Informatics (Japan)

EXPERIMENTAL QUANTUM METROLOGY

7225 OL **Structures in diamond for optical manipulation of nitrogen-vacancy centers (Invited Paper)** [7225-20]
C. Santori, K.-M. C. Fu, P. E. Barclay, R. G. Beausoleil, Hewlett-Packard Labs. (United States)

7225 OM **Quantum optomechanical correlations induced by radiation pressure between light and mirrors (Invited Paper)** [7225-21]
T. Briant, P. Verlot, A. Tavernarakis, P.-F. Cohadon, A. Heidmann, Lab. Kastler Brossel, CNRS, Univ. Pierre et Marie Curie (France)

ENTANGLEMENT METROLOGY

7225 OQ **Quantum Mie scattering and metrology with a Fabry-Pérot interferometer and quantum states of light (Invited Paper)** [7225-26]
C. F. Wildfeuer, S. D. Huver, J. P. Dowling, Louisiana State Univ. (United States)

7225 OR **Prolonging qubit coherence: dynamical decoupling schemes studied in a Penning ion trap (Invited Paper)** [7225-34]
H. Uys, National Institute of Standards and Technology (United States) and Council for Scientific and Industrial Research (United States); M. J. Biercuk, National Institute of Standards and Technology (United States) and Georgia Institute of Technology (United States); A. P. VanDevender, N. Shiga, W. M. Itano, J. J. Bollinger, National Institute of Standards and Technology (United States)

ALTERNATIVE PERCEPTIONS AND TECHNIQUES

- 7225 OT **Density matrix approach to the Heisenberg-limited interferometry: an example (Invited Paper)** [7225-28]
A. Chiruvelli, H. Lee, Louisiana State Univ. (United States)

Author Index

Conference Committee

Symposium Chair

James G. Grote, Air Force Research Laboratory (United States)

Symposium Cochair

E. Fred Schubert, Rensselaer Polytechnic Institute (United States)

Program Track Chair

Zameer U. Hasan, Temple University (United States)

Conference Chairs

Zameer U. Hasan, Temple University (United States)

Alan E. Craig, Montana State University, Bozeman (United States)

Philip R. Hemmer, Texas A&M University (United States)

Program Committee

Aleksander K. Rebane, Montana State University, Bozeman (United States)

Charles M. Santori, Hewlett-Packard Laboratories (United States)

Selim M. Shahriar, Northwestern University (United States)

Alan E. Willner, University of California, Los Angeles (United States)

Session Chairs

- 1 Single Atom or Spin for Quantum Computing
Charles M. Santori, Hewlett-Packard Laboratories (United States)
- 2 Nanoscale Devices and Sensing
Aleksander K. Rebane, Montana State University, Bozeman (United States)
- 3 Photorefractives and Photonic Crystals for Quantum Computing
Philip R. Hemmer, Texas A&M University (United States)
- 4 New Concepts and Systems
Zameer U. Hasan, Temple University (United States)

- 5 Experimental Quantum Metrology
Hwang Lee, Louisiana State University (United States)
- 6 Entanglement Metrology
Charles M. Santori, Hewlett-Packard Laboratories (United States)
- 7 Alternative Perceptions and Techniques
Alan E. Craig, Montana State University, Bozeman (United States)
- 8 Quantum Phase and Quantum Imaging
Alan L. Migdall, National Institute of Standards and Technology (United States)
