**Volume 7199**

Proceedings of SPIE, 0277-786X, v. 7199

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Free-Space Laser Communication Technologies XXI*, edited by Hamid Hemmati, Proceedings of SPIE Vol. 7199 (SPIE, Bellingham, WA, 2009) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at [copyright.com](http://copyright.com). Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/09/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

**Paper Numbering:** Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

# Contents

vii *Conference Committee*

---

## SESSION 1 INVITED SESSION I

---

- 7199 02 **Technology needs for next-generation spaceborne lasercom systems (Invited Paper)** [7199-01]  
R. W. Burch, The Boeing Co. (United States)
- 7199 03 **Optical data downlinks from Earth observation platforms (Invited Paper)** [7199-02]  
D. Giggenbach, J. Horwath, M. Knapek, German Aerospace Ctr. (Germany)
- 7199 04 **Research and development activities on space laser communications in NICT (Invited Paper)** [7199-03]  
H. Kunimori, Y. Shoji, M. Toyoshima, Y. Takayama, National Institute of Information and Communications Technology (Japan)

---

## SESSION 2 INVITED SESSION II

---

- 7199 06 **5.6 Gbps optical intersatellite communication link (Invited Paper)** [7199-05]  
B. Smutny, H. Kaempfer, G. Muehlnikel, U. Sterr, B. Wandernoth, F. Heine, U. Hildebrand, D. Dallmann, M. Reinhardt, A. Freier, R. Lange, K. Boehmer, T. Feldhaus, J. Mueller, A. Weichert, P. Greulich, S. Seel, Tesat-Spacecom GmbH & Co. KG (Germany); R. Meyer, Deutsches Zentrum für Luft- und Raumfahrt e.V. (Germany); R. Czichy, Synopta (Switzerland)

---

## SESSION 3 DEMONSTRATIONS

---

- 7199 07 **Experimental evaluation of a radio-on-FSO communication system for multiple RF signal transmission** [7199-06]  
K. Kazaura, P. Dat, A. Bekkali, A. Shah, T. Suzuki, K. Wakamori, M. Matsumoto, Waseda Univ. (Japan); T. Nakamura, K. Takahashi, T. Higashino, Y. Aburakawa, K. Tsukamoto, S. Komaki, Osaka Univ. (Japan)
- 7199 08 **Compact free-space optical terminal for multi-gigabit signal transmissions with a single-mode fiber** [7199-07]  
Y. Arimoto, National Institute of Information and Communications Technology (Japan)
- 7199 09 **Aircraft to ground unidirectional laser-communications terminal for high-resolution sensors** [7199-08]  
J. Horwath, C. Fuchs, German Aerospace Ctr. (Germany)
- 7199 0A **Demonstration of a high-efficiency free-space optical communications link** [7199-09]  
K. Birnbaum, W. Farr, J. Gin, B. Moision, K. Quirk, M. Wright, Jet Propulsion Lab. (United States)

- 7199 0B **Results from the DOLCE (Deep Space Optical Link Communications Experiment) project** [7199-10]  
G. Baister, K. Kudielka, T. Dreischer, M. Tüchler, Oerlikon Space AG (Switzerland)
- 7199 0C **Robust short-pulse high-peak-power laser transmitter for optical communications** [7199-11]  
M. W. Wright, Jet Propulsion Lab. (United States)
- 7199 0D **Compensation of large-diameter optical system aberrations with spatial light modulators and deformable mirrors** [7199-12]  
H. Hemmati, Y. Chen, Jet Propulsion Lab. (United States)
- 7199 0E **Mid-infrared interband cascade lasers for free-space laser communication** [7199-13]  
A. Soibel, M. Wright, W. Farr, S. Keo, C. Hill, Jet Propulsion Lab. (United States); R. Q. Yang, Univ. of Oklahoma (United States); H. C. Liu, National Research Council (Canada)

---

#### **SESSION 4 ACQUISITION, TRACKING, AND POINTING**

- 7199 0H **Autonomous access links using laser communications** [7199-16]  
J. M. Kovalik, A. Biswas, J. R. Charles, M. Regehr, Jet Propulsion Lab. (United States)
- 7199 0I **A sub-hertz vibration isolation platform for a deep space optical communication transceiver** [7199-17]  
V. Sannibale, G. G. Ortiz, W. H. Farr, Jet Propulsion Lab. (United States)

---

#### **SESSION 5 SYSTEMS UNDER DEVELOPMENT**

- 7199 0K **Canonical deep space optical communications transceiver** [7199-19]  
G. G. Ortiz, W. H. Farr, J. R. Charles, W. T. Roberts, V. Sannibale, J. Gin, A. Saharaspude, V. Garkanian, Jet Propulsion Lab. (United States)
- 7199 0L **Compact deep-space optical communications transceiver** [7199-20]  
W. T. Roberts, J. R. Charles, Jet Propulsion Lab. (United States)
- 7199 0M **BER performance of MIMO diffuse free-space optical systems** [7199-21]  
D. S. Pfeil, S. Vamsidhar, T. P. Kurzweg, K. R. Dandekar, Drexel Univ. (United States)
- 7199 0N **Combined laser communications and laser ranging transponder for Moon and Mars** [7199-22]  
H. Hemmati, K. M. Birnbaum, W. H. Farr, S. Turyshev, A. Biswas, Jet Propulsion Lab. (United States)
- 7199 0O **A new deformable mirror and experimental setup for free-space optical communication** [7199-32]  
F. Rooms, S. Camet, J. Charton, J.-F. Curis, L. Jocou, ALPAO (France)
- 7199 0P **Modified PN code laser modulation technique for laser measurements** [7199-33]  
X. Sun, J. B. Abshire, NASA Goddard Space Flight Ctr. (United States)

---

**SESSION 6 DETECTORS AND RECEIVERS**

---

- 7199 0Q **Negative avalanche feedback detectors for photon-counting optical communications** [7199-23]  
W. H. Farr, Jet Propulsion Lab. (United States)

---

**SESSION 7 ANALYSIS**

---

- 7199 0S **Virtual array receiver options for 64-ary pulse position modulation (PPM)** [7199-26]  
A. J. Mendez, Mendez R&D Associates (United States); V. J. Hernandez, Lawrence Livermore National Lab. (United States); R. M. Gagliardi, Univ. of Southern California (United States); C. V. Bennett, Lawrence Livermore National Lab. (United States)
- 7199 0T **Improved bit error rate estimation over experimental optical wireless channels** [7199-27]  
M. El Tabach, France Télécom (France); S. Saoudi, TELECOM Bretagne, CNRS Lab-STICC, Univ. européenne de Bretagne (France); P. Tortelier, O. Bouchet, France Télécom (France); R. Pyndiah, TELECOM Bretagne, CNRS Lab-STICC, Univ. européenne de Bretagne (France)
- 7199 0V **Using MIMO transmissions in free-space optical communications in presence of clouds and turbulence** [7199-29]  
Z. Hajjarian, M. Kavehrad, The Pennsylvania State Univ. (United States)

# Conference Committee

## *Symposium Chairs*

**Donald J. Harter**, IMRA America, Inc. (United States)  
**Peter R. Herman**, University of Toronto (Canada)

## *Symposium Cochairs*

**Henry Helvajian**, The Aerospace Corporation (United States)  
**Friedrich G. Bachmann**, Rofin-Sinar Laser GmbH (Germany)

## *Conference Chair*

**Hamid Hemmati**, Jet Propulsion Laboratory (United States)

## *Program Committee*

**Guy C. Baister**, Oerlikon Space AG (Switzerland)  
**David Begley**, Ball Aerospace & Technologies Corporation (United States)  
**Don M. Boroson**, MIT Lincoln Laboratory (United States)  
**Robert T. Carlson**, BAE Systems (United States)  
**Wayne R. Fenner**, The Aerospace Corporation (United States)  
**Yoshisada Koyama**, National Institute of Information and Communications Technology (Japan)  
**Robert Lange**, Tesat-Spacecom GmbH & Co. KG (Germany)  
**Donald J. Nicholson**, Air Force Research Laboratory (United States)  
**Zoran Sodnik**, European Space Agency (Netherlands)  
**Morio Toyoshima**, National Institute of Information and Communications Technology (Japan)  
**Alan E. Willner**, University of Southern California (United States)  
**Shiro Yamakawa**, Japan Aerospace Exploration Agency (Japan)

## *Session Chairs*

- 1 Invited Session I  
**Hamid Hemmati**, Jet Propulsion Laboratory (United States)
- 2 Invited Session II  
**Hamid Hemmati**, Jet Propulsion Laboratory (United States)
- 3 Demonstrations  
**Don M. Boroson**, MIT Lincoln Laboratory (United States)

- 4 Acquisition, Tracking, and Pointing  
**Ronald W. Burch**, The Boeing Co. (United States)
- 5 Systems Under Development  
**William H. Farr**, Jet Propulsion Laboratory (United States)
- 6 Detectors and Receivers  
**Hamid Hemmati**, Jet Propulsion Laboratory (United States)
- 7 Analysis  
**Abhijit Biswas**, Jet Propulsion Laboratory (United States)
