Volume 7454

Proceedings of SPIE, 0277-786X, v. 7454

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:
Author(s), "Title of Paper," in *Remote Sensing and Modeling of Ecosystems for Sustainability VI*, edited by Wei Gao, Thomas J. Jackson, Proceedings of SPIE Vol. 7454 (SPIE, Bellingham, WA, 2009) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is $18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/09/$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

ix *Conference Committee*

SESSION 1 ECOLOGICAL REMOTE SENSING THEORY, TECHNIQUES, AND APPLICATIONS I

7454 02 **NEON: the first continental-scale ecological observatory with airborne remote sensing of vegetation canopy biochemistry and structure (Invited Paper)** [7454-01]
B. R. Johnson, T. U. Kampe, M. A. Kuester, M. Keller, NEON, Inc. (United States)

7454 03 **Remote sensing techniques to monitor nitrogen-driven carbon dynamics in field corn** [7454-02]
L. A. Corp, Sigma Space Corp. (United States); E. M. Middleton, NASA Goddard Space Flight Ctr. (United States); P. K. E. Campbell, K. F. Huemmrich, Univ. of Maryland, Baltimore County (United States); Y.-B. Cheng, Earth Resources Technology Inc. (United States); C. S. T. Daughtry, U.S. Dept. of Agriculture (United States)

7454 04 **Analyzing time series of vegetation index and land cover for vegetation change detection over continental U.S.** [7454-03]
D. Wu, J. J. Qu, L. Wang, X. Hao, George Mason Univ. (United States)

7454 06 **Validation of microwave vegetation indices using field experiment data sets (Invited Paper)** [7454-05]
T. J. Jackson, USDA Agricultural Research Service (United States); J. C. Shi, Univ. of California, Santa Barbara (United States); R. Bindlish, Science Systems and Applications, Inc. (United States); M. Cosh, USDA Agricultural Research Service (United States); L. Chai, J. Du, S. Zhao, J. Tao, Beijing Normal Univ. (China)

7454 08 **Using a partial least squares (PLS) method for estimating cyanobacterial pigments in eutrophic inland waters** [7454-07]
A. L. Robertson, L. Li, L. Tedesco, J. Wilson, Indiana Univ.-Purdue Univ. Indianapolis (United States); E. Soyeux, Veolia Environnement (France)

SESSION 2 ECOLOGICAL REMOTE SENSING THEORY, TECHNIQUES, AND APPLICATIONS II

7454 09 **Remote sensing of canopy water content: scaling from leaf data to MODIS (Invited Paper)** [7454-09]
E. R. Hunt, Jr., USDA Agricultural Research Service (United States); J. J. Qu, X. Hao, L. Wang, George Mason Univ. (United States)

7454 0D **Measuring surface water in soil with light reflectance (Invited Paper)** [7454-13]
M. L. Whiting, Univ. of California, Davis (United States)

7454 0E **Heat island effect and urban storm events of San Antonio downtown area by MODIS/AQUA temperature sensor** [7454-14]
A. Daranpob, N.-B. Chang, Univ. of Central Florida (United States); H. Xie, The Univ. of Texas at San Antonio (United States)

7454 0H **Research on Beijing human settlement in district level by GIS spatial analyzing** [7454-16]
X. Zhang, Beijing Union Univ. (China) and Institute of Geographical Sciences and Natural Resources Research (China); W. Yin, Beijing Union Univ. (China); S. Dong, Institute of Geographical Sciences and Natural Resources Research (China); H. Guo, Beijing Union Univ. (China)

SESSION 3 AGRICULTURAL AND FOREST REMOTE SENSING AND APPLICATIONS

7454 0J **Monitoring the algal bloom event in Lake Okeechobee, Florida under Tropical Cyclone Fay impacts using MODIS/Terra images (Invited Paper)** [7454-18]
A. Daranpob, N.-B. Chang, Univ. of Central Florida (United States); K.-R. Jin, South Florida Water Management District (United States); Y. J. Yang, U.S. Environmental Protection Agency (United States)

7454 0L **Monitoring phenology variations of different forest types from 2000 to 2008 in contiguous United States using MODIS LAI measurements** [7454-20]
M. Li, J. J. Qu, George Mason Univ. (United States)

7454 0M **Crop yield and CO_2 fixation monitoring over Asia by a photosynthetic-sterility model comparing with MODIS and carbon amounts in grain yields** [7454-21]
D. Kaneko, Remote Sensing Environmental Monitor, Inc. (Japan); P. Yang, Chinese Academy of Agricultural Sciences (China); T. Kumakura, Nagaoka Univ. of Technology (Japan)

7454 0O **The sensitivity of RADARSAT-2 quad-polarization SAR data to crop LAI (Invited Paper)** [7454-23]
X. Jiao, H. McNairn, J. Shang, E. Pattey, J. Liu, C. Champagne, Agriculture and Agri-Food Canada (Canada)

7454 0P **Partial least squares modeling of Hyperion image spectra for mapping agricultural soil properties** [7454-24]
T. Zhang, Indiana Univ.-Purdue Univ. Indianapolis (United States) and Jilin Univ. (China); L. Li, B. Zheng, Indiana Univ.-Purdue Univ. Indianapolis (United States)

7454 0Q **Forest LAI estimation comparison using LiDAR and hyperspectral data in boreal and temperate forests** [7454-25]
Y. Pang, B. Tan, Chinese Academy of Forestry (China); S. Solberg, Norwegian Forest and Landscape Institute (Norway); Z. Li, Chinese Academy of Forestry (China)

7454 0R **Forest canopy structural parameters and Leaf Area Index retrieval using multi-sensors synergy observations** [7454-26]
Z. Fu, J. Wang, J. Song, H. Zhou, Beijing Normal Univ. (China); Y. Pang, Chinese Academy of Forestry (China); W. Cai, B. Chen, Beijing Normal Univ. (China)

SESSION 4 ECOLOGICAL REMOTE SENSING THEORY, TECHNIQUES, AND APPLICATIONS III

7454 0V **Estimation of canopy water content with MODIS spectral index** [7454-32]
Z. Jiang, L. Li, Indiana Univ.-Purdue Univ. Indianapolis (United States); S. L. Ustin, Univ. of California, Davis (United States)

POSTER SESSION

7454 0X **Interferometric sensor for plant fluorescence** [7454-06]
E. Georgieva, Goddard Earth Sciences and Technology Ctr. (United States); W. S. Heaps, E. M. Middleton, NASA Goddard Space Flight Ctr. (United States); P. K. E. Campbell, Joint Ctr. for Earth Systems Technology (United States); L. A. Corp, Science Systems and Applications, Inc. (United States)

7454 0Z **Effects of diabatic heating on the short-term position variation of the west Pacific subtropical high during persistent heavy rain event in South China** [7454-34]
L. Wang, Z. Guan, B. Yu, G. Zeng, J. He, Nanjing Univ. of Information Science & Technology (China)

7454 10 **Land cover classification based on the MODIS-EVI time-series using decision tree method** [7454-35]
R. Meng, Institute of Geographical Sciences and Natural Resources Research (China) and Graduate Univ. of CAS (China); Z. Gao, Institute of Geographical Sciences and Natural Resources Research (China)

7454 11 **100a climate change and its impact on vegetation ecological zoning in China** [7454-36]
Z. Gao, Institute of Geographical Sciences and Natural Resources Research (China), East China Normal Univ. (China), and Colorado State Univ. (United States); M. Ran, Institute of Geographical Sciences and Natural Resources Research (China) and Graduate School, CAS (China); W. Gao, East China Normal Univ. (China) and Colorado State Univ. (United States)

7454 12 **Atmospheric correction model of Landsat images** [7454-37]
C. Liu, East China Normal Univ. and Ctr. for Earth Observation and Digital Earth (China); W. Gao, East China Normal Univ. and Ctr. for Earth Observation and Digital Earth (China) and Colorado State Univ. (United States); Z. Gao, Colorado State Univ. (United States) and Institute of Geographic Sciences and Natural Resources Research (China); R. Shi, East China Normal Univ. and Ctr. for Earth Observation and Digital Earth (China)

7454 15 **Estimating photosynthetic light-use efficiency of Changbai Mountain by using MODIS-derived photochemical reflectance index** [7454-40]
X. Xie, Jiangsu Meteorological Observatory (China); Z. Gao, Institute of Geographical Sciences and Natural Resources Research (China); W. Gao, Colorado State Univ. (United States)

7454 16 **Using remote sensing data to estimate land surface variables over the Tibetan Plateau** [7454-41]
J. Guo, Institute of Plateau Meteorology (China) and Nanjing Univ. of Information Science & Technology (China); S. Shen, S. Yang, Nanjing Univ. of Information Science & Technology (China)

7454 17 **The temperature change of regional difference in Anhui Province, China** [7454-42]
K. Liu, East China Normal Univ. and Ctr. for Earth Observation and Digital Earth (China); Z. Gao, Institute of Geographical Sciences and Natural Resources Research (China); W. Gao, East China Normal Univ. and Ctr. for Earth Observation and Digital Earth (China) and Colorado State Univ. (United States)

7454 18 **Construction and validation of a new model for cropland soil moisture index based on MODIS data** [7454-43]
H. Chen, Henan Institute of Meteorological Sciences (China); H. Zhang, Henan Institute of Meteorological Sciences (China), Meteorological Bureau of XinXiang (China), and Nanjing Univ. of Information Science & Technology (China); S. Shen, Nanjing Univ. of Information Science & Technology (China); W. Yu, C. Zou, Henan Institute of Meteorological Sciences (China)

7454 19 **Spatial/temporal features of SSTA in Kuroshio and its relation to atmospheric circulation** [7454-44]
D. Ni, Z. Sun, H. Chen, W. Zhu, G. Zeng, Nanjing Univ. of Information Science & Technology (China)

7454 1A **Natural variability of East Asian summer monsoon simulated by NCAR Cam3 model** [7454-45]
G. Zeng, Nanjing Univ. of Information Science & Technology (China) and Institute of Atmospheric Physics (China); W.-C. Wang, Univ. at Albany, SUNY (United States); Z. Sun, Nanjing Univ. of Information Science & Technology (China); Z. Lin, Institute of Atmospheric Physics (China)

7454 1C **A research on assessing method of frost damage in winter wheat in Huanghuai area** [7454-48]
W. Yu, Meteorological Science Research Institute of Henan Province (China); X. Zhang, China Meteorological Administration (China)

7454 1D **Crop classification using MODIS EVI series in North China** [7454-49]
M. Chen, Institute of Geographical Sciences and Natural Resources Research (China) and Graduate School, CAS (China); Z. Gao, Institute of Geographical Sciences and Natural Resources Research (China), East China Normal Univ. (China), and Colorado State Univ. (United States); W. Gao, East China Normal Univ. (China) and Colorado State Univ. (United States)

7454 1G **Study on soil water indexes of growth and development for winter wheat** [7454-53]
W. Fang, R. Liu, Z. Zhu, Henan Institute of Meteorological Science (China); T. Deng, Henan Provincial Meteorological Bureau (China); L. Shi, Henan Institute of Meteorological Science (China)

7454 1H **Validation of crop model for simulating summer maize in the Huang-Huai Plain of China and its application on analyzing drought effects** [7454-54]
S. Li, R. Liu, L. Cheng, W. Fang, Henan Institute of Meteorological Science (China); X. Wang, Colorado State Univ. (United States)

7454 1J **Analyzing the relationship between urban heat island and land use/cover changes in Beijing using remote sensing images** [7454-56]
X. Zhao, S. Yang, S. Shen, Nanjing Univ. of Information Science & Technology (China); Y. Hai, Beijing Meteorological Bureau (China); Y. Fang, Nanjing Univ. of Information Science & Technology (China)

7454 1L **Design and implementation for satellite remote sensing forest fire-points automatic monitoring system** [7454-58]
C. Zou, Henan Institute of Meteorological Science (China) and China Meteorological Administration (China); H. Chen, Henan Institute of Meteorological Science (China); Q. Yin, PLA Information Engineering Univ. (China)

7454 1P **Application of MODIS data for assessment of evapotranspiration and drought in Northern China** [7454-65]
C. Liu, East China Normal Univ. and Ctr. for Earth Observation and Digital Earth (China); W. Gao, East China Normal Univ. and Ctr. for Earth Observation and Digital Earth (China) and Colorado State Univ. (United States); Z. Gao, Colorado State Univ. (United States) and Institute of Geographical Sciences and Natural Resources Research (China); R. Shi, East China Normal Univ. and Ctr. for Earth Observation and Digital Earth (China)

Author Index

Conference Committee

Conference Chair

Wei Gao, Colorado State University (United States)

Cochair

Thomas J. Jackson, USDA Agricultural Research Service (United States)

Program Track Chair

Allen H.-L. Huang, University of Wisconsin, Madison (United States)

Program Committee

Gregory Paul Asner, Stanford University (United States)
Ni-Bin Chang, University of Central Florida (United States)
Xiuwan Chen, Peking University (China)
John A. Gamon, California State University, Los Angeles (United States)
E. Raymond Hunt, Jr., USDA Agricultural Research Service (United States)
John M. Melack, University of California, Santa Barbara (United States)
Dennis Ojima, Colorado State University (United States)
Jeffrey L. Privette, National Climatic Data Center (United States)
Jiaguo Qi, Michigan State University (United States)
John J. Qu, George Mason University (United States)
Daniel L. Schmoldt, U.S. Department of Agriculture (United States)
Jiong Shu, East China Normal University (China)
Susan L. Ustin, University of California, Davis (United States)
Hongjie Xie, The University of Texas at San Antonio (United States)
Denghua Yan, China Institute of Water Resources and Hydropower Research (China)
Xiaobing Zhou, Montana Tech of the University of Montana (United States)

Session Chairs

1 Ecological Remote Sensing Theory, Techniques, and Applications I
Thomas J. Jackson, USDA Agricultural Research Service (United States)
Brian R. Johnson, NEON, Inc. (United States)

2 Ecological Remote Sensing Theory, Techniques, and Applications II
E. Raymond Hunt, Jr., USDA Agricultural Research Service (United States)
Michael L. Whiting, University of California, Davis (United States)

3 Agricultural and Forest Remote Sensing and Applications
Ni-Bin Chang, University of Central Florida (United States)
Min Xu, University of Illinois at Urbana-Champaign (United States)

4 Ecological Remote Sensing Theory, Techniques, and Applications III
Hongjie Xie, The University of Texas at San Antonio (United States)
John J. Qu, George Mason University (United States)
