Volume 12022

Proceedings of SPIE 0277-786X, V. 12022

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Light-Emitting Devices, Materials, and Applications XXVI, edited by Jong Kyu Kim,
Michael R. Krames, Martin Strassburg, Proc. of SPIE Vol. 12022, 1202201
© 2022 SPIE · 0277-786X · doi: 10.1117/12.2634946

Proc. of SPIE Vol. 12022 1202201-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Light-Emitting Devices, Materials, and Applications XXVI*, edited by Jong Kyu Kim, Michael R. Krames, Martin Strassburg, Proc. of SPIE 12022, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vi *Conference Committee*

MICROLEDS AND AR/VR/MR

- 12022 02 **Ion implantation as a new strategy for micro-LED pixelation (Invited Paper)** [12022-4]
- 12022 03 **MicroLED architectures for low power wearable displays** [12022-7]
- 12022 04 **Image sources in next-generation near-to-eye applications: challenges and solutions (Invited Paper)** [12022-9]

UV EMITTERS

- 12022 06 **UV-C LEDs and their use in disinfection applications (Invited Paper)** [12022-15]
- 12022 07 **Calibrated networkable UV-C sensors for real-time dosage characterization of UVGI devices** [12022-54]
- 12022 08 **Analysis and design of SARS-CoV-2 disinfection chambers based on UVC LEDs** [12022-17]

ADVANCED EMITTERS

- 12022 09 **Highly efficient pixelated near-infrared OLED light source** [12022-24]
- 12022 0A **Active NIR illumination for improved camera view in automated driving application** [12022-25]
- 12022 0B **Improved mid-infrared W-superlattice LEDs using Al-treated source** [12022-26]

ADVANCED EMITTERS II

- 12022 0C **Use of electrochemistry in mini-/micro-LEDs and VCSELs (Invited Paper)** [12022-43]

LIFI, SENSING, AND COMMUNICATIONS

- 12022 OD **Enhancing indoor optical wireless communication system performance by sectorization (Invited Paper)** [12022-48]
- 12022 OE **Management of split intersections using vehicular visible light communication** [12022-49]
- 12022 OF **LED assessment based on an improved quality factor for LiFi communication** [12022-50]

LED TECHNOLOGY, MANUFACTURING, AND RELIABILITY

- 12022 OG **Defects in III-N LEDs: experimental identification and impact on electro-optical characteristics (Invited Paper)** [12022-28]
- 12022 OH **Modeling the effect of spatial position and concentration of defects on optical degradation of InGaN/GaN multi quantum well light emitting diodes** [12022-29]

QUANTUM DOTS AND PEROVSKITES

- 12022 OI **Tunable emission color of methylammonium lead bromide perovskite quantum dots by varying ligand quantity** [12022-36]
- 12022 OK **Enhanced conversion efficiency and tailored radiation patterns assisted by photonic-crystal light-extractors in compact MQW based color-converters for μ LED applications** [12022-37]

HIGH-POWER DOWN CONVERTERS

- 12022 OJ **High luminance white light generation with static ceramic luminescent converters** [12022-40]
- 12022 OL **Analysis of high-power operation of laser excited stationary phosphor** [12022-41]
- 12022 OM **Rapid fabrication of YAG-Ce phosphor glass composites on borosilicate glass for white light LEDs** [12022-42]

POSTER SESSION

- 12022 ON **Stamped metallic optical reflectors for ultraviolet light emitting diodes** [12022-52]
- 12022 OO **Laser-driven white light generation by mixing blue (BAM), green (GYAG), and red (nitride) phosphors** [12022-56]

- 12022 0P **A low-cost AI-enabled automated UV LED lifetime testing system with angular beam mapping**
[12022-60]
- 12022 0Q **Low-cost LED UV source with power and wavelength variable emission** [12022-64]

Conference Committee

Symposium Chairs

Bernd Witzigmann, Friedrich-Alexander-Universität Erlangen-Nürnberg
(Germany)
Sonia M. García-Blanco, Universitat Twente (Netherlands)

Symposium Co-Chairs

Sailing He, Zhejiang University (China) and KTH Royal Institute of Technology
(Sweden)
Yasuhiro Koike, Keio University (Japan)

Program Track Chair

Klaus P. Streubel, OSRAM GmbH (United States)

Conference Chairs

Jong Kyu Kim, Pohang University of Science and Technology
(Korea, Republic of)
Michael R. Krames, Arkesso, LLC (United States)
Martin Strassburg, OSRAM Opto Semiconductors GmbH (Germany)

Conference Program Committee

Jim R. Bonar, Facebook Technologies, LLC (United States)
Yong-Hoon Cho, KAIST (Korea, Republic of)
Aurelien David, Google (United States)
Amélie Dussaigne, CEA-LETI (France)
Kolja Haberland, LayTec AG (Germany)
Jana Hartmann, Technische Universität Braunschweig (Germany)
Michael Heuken, AIXTRON SE (Germany)
Christoph G. A. Hoelen, Signify N.V. (Netherlands)
Hee Jin Kim, Lumileds, LLC (United States)
Juanita N. Kurtin, OSRAM Opto Semiconductors Inc. (United States)
Soo Min Lee, Veeco Compound Semiconductor Inc. (United States)
Yun-Li Li, PlayNitride Inc. (Taiwan)
Tien-Chang Lu, National Chiao Tung University (Taiwan)
Koh Matsumoto, Taiyo Nippon Sanso Corporation (Japan)
Matteo Meneghini, University degli Studi di Padova (Italy)
Klaus P. Streubel, OSRAM GmbH (United States)
Tetsuya Takeuchi, Meijo University (Japan)
Rie Togashi, Sophia University (Japan)
Marie Anne van de Haar, Seaborough Research B.V. (Netherlands)
Dong-Sing Wu, National Chung Hsing University (Taiwan)
Erin C. Young, Apple Inc. (United States)
