SPIE

Volume 8397

Proceedings of SPIE, 0277-786X, v. 8397

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Enabling Photonics Technologies for Defense, Security, and Aerospace Applications VIII*, edited by Michael J. Hayduk, Peter J. Delfyett, Jr., Andrew R. Pirich, Eric Donkor, Proceedings of SPIE Vol. 8397 (SPIE, Bellingham, WA, 2012) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/12/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

The logo for SPIE Digital Library features the word "SPIE" in a bold, sans-serif font above the words "Digital Library" in a smaller, lighter font. To the right of the text is a stylized graphic consisting of four vertical bars of increasing height from left to right, with a red swoosh above them.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

v *Conference Committee*

SESSION 1 PHOTONIC COMMUNICATION SYSTEMS AND TECHNOLOGY

- 8397 02 **Mathematical modeling and experimental analysis of multiple channel orbital angular momentum in spatial domain multiplexing** [8397-01]
S. H. Murshid, H. P. Muralikrishnan, S. P. Kozaitis, Florida Institute of Technology (United States)
- 8397 03 **Orbital angular momentum in four channel spatial domain multiplexing system for multi-terabit per second communication architectures** [8397-02]
S. H. Murshid, H. P. Muralikrishnan, S. P. Kozaitis, Florida Institute of Technology (United States)
- 8397 04 **Experimental auto-compensating multi-user quantum key distribution network using a wavelength-addressed bus line architecture (Invited Paper)** [8397-03]
E. Donkor, Univ. of Connecticut (United States)
- 8397 05 **Co-site interference mitigation using optical signal processing** [8397-04]
M. Lu, J. Bruno, Y. Deng, P. R. Prucnal, Princeton Univ. (United States); A. Hofmaier, U.S. Army Information and Intelligence Warfare Directorate (United States)

SESSION 2 PHOTONIC DEVICES AND SUBSYSTEMS

- 8397 06 **A variable mechanical optical attenuator** [8397-05]
O. Shehab, Univ. of Maryland, Baltimore County (United States)
- 8397 07 **A passively modelocked laser with tunable pulse-repetition frequency in a semiconductor optical amplifier** [8397-06]
E. Donkor, K. Kaltenecker, Univ. of Connecticut (United States)
- 8397 08 **Modeling InGaAsP/InP/Au distributed feedback lasers for optical communications** [8397-07]
M.-M. Shih, Univ. of Florida (United States)
- 8397 09 **Toward a widely tunable narrow linewidth RF source through heterogenous silicon photonic integration (Invited Paper)** [8397-08]
G. A. Ejzak, D. W. Grund, Jr., G. J. Schneider, J. Murakowski, S. Shi, D. W. Prather, Univ. of Delaware (United States)
- 8397 0A **Experimental demonstration of an all optical flip flop memory** [8397-09]
K. Kaltenecker, E. Donkor, Univ. of Connecticut (United States)

SESSION 3 PHOTONIC SYSTEM TECHNOLOGY

- 8397 0D **2D real-time arithmetic operations using optical coherence properties: image processing applications** [8397-12]
B.-E. Benkelfat, S. El Wardi, CNRS, Institut Télécom - Télécom SudParis (France); M. Zghal, Univ. of Carthage (Tunisia); A. Alfalou, ISEN Brest (France)

POSTER SESSION

- 8397 0F **Transmitter for free-space optics with an integrated driver** [8397-14]
J. Mikolajczyk, J. Wojtas, M. Gutowska, M. Nowakowski, D. Szabra, B. Rutecka, R. Medrzycki, Z. Bielecki, Military Univ. of Technology (Poland)
- 8397 0G **An integrated driver for quantum cascade lasers** [8397-15]
J. Mikolajczyk, Military Univ. of Technology (Poland); R. Niedbala, M. Wesolowski, Warsaw Univ. of Technology (Poland); J. Wojtas, D. Szabra, Z. Bielecki, Military Univ. of Technology (Poland)
- 8397 0H **Photonic analog-to-digital converter via asynchronous oversampling** [8397-16]
S. Carver, E. Reeves, A. Siahmakoun, S. Granieri, Rose-Hulman Institute of Technology (United States)

Author Index

Conference Committee

Symposium Chair

Kevin P. Meiners, Office of the Secretary of Defense (United States)

Symposium Cochair

Kenneth R. Israel, Lockheed Martin Corporation (United States)

Conference Chairs

Michael J. Hayduk, Air Force Research Laboratory (United States)

Peter J. Delfyett, Jr., CREOL, The College of Optics and Photonics,
University of Central Florida (United States)

Conference Cochairs

Andrew R. Pirich, ACP Consulting (United States)

Eric Donkor, University of Connecticut (United States)

Program Committee

H. John Caulfield, Diversified Research Corporation (United States)

Reinhard K. Erdmann, Air Force Research Laboratory (United States)

Michael L. Fanto, Air Force Research Laboratory (United States)

Sangyoung Gee, Gwangju Institute of Science and Technology (Korea,
Republic of)

Bahram Javidi, University of Connecticut (United States)

Robert L. Kaminski, Air Force Research Laboratory (United States)

Guifang Li, CREOL, The College of Optics and Photonics, University of
Central Florida (United States)

Joseph M. Osman, Air Force Research Laboratory (United States)

Edward W. Taylor, International Photonics Consultants, Inc. (United
States)

Henry Zmuda, University of Florida (United States)

Session Chairs

- 1 Photonic Communication Systems and Technology
Michael J. Hayduk, Air Force Research Laboratory (United States)

- 2 Photonic Devices and Subsystems
Michael L. Fanto, Air Force Research Laboratory (United States)
- 3 Photonic System Technology
Eric Donkor, University of Connecticut (United States)
